

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Dominica. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing that about yourself — it sounds like you're at an exciting point in your life with many possibilities ahead! Since you're 16, have completed primary school (likely *folkeskole* or equivalent), and are considering your next educational step, I'll outline some good options based on the Danish education system and offer suggestions for how you might choose:

🇩🇰 Your main options after primary school in Denmark

1 Gymnasiale uddannelser (Upper secondary education / high school equivalents)

These are academic programs that prepare you for university or higher education. They typically last 3 years:

- **STX** (*studentereksamen*): General upper secondary with a broad mix of subjects — good if you're interested in humanities, social sciences, natural sciences, or languages.
- **HHX**: Focuses on business, economics, and international trade — good if you're interested in commerce or entrepreneurship.
- **HTX**: Technical and scientific focus — great if you like technology, engineering, or science.
- **HF**: A 2-year program (or 3-year for young people) with a more practical focus, often chosen by those who want a quicker route to certain higher education or professions.

2 Erhvervsuddannelser (Vocational education and training - VET)

These combine school with apprenticeships in companies and can lead directly to a trade or craft (e.g., carpenter, electrician, chef, hairdresser). They can also give access to higher education if you choose the *eux* route (VET + general education).

🌱 How to choose?

Since you're fluent in Danish and grew up in Denmark, you have access to all these paths without extra barriers. Here's what to think about:

✅ **What subjects do you enjoy most?** → If you like academic subjects and think university could be in your future, gymnasiale uddannelser may be best.

✅ **Do you want to work with your hands or get into a job quickly?** → Then VET could be the perfect fit.

✅ **Do you like business, tech, or creative areas?** → HHX, HTX or specific VET programs could match your interests.

✅ **Are you unsure?** → STX is the most general path, keeping many doors open.

💡 My recommendation for you

➡ Since you've completed primary school and are fluent in Danish, I'd recommend:

- **STX if you're not yet sure what you want to specialize in but want to keep university open as an option.**
- **HHX or HTX if you already feel drawn to business or technical fields.**
- **VET if you know you want to learn a specific trade or get into the workforce sooner.**

📝 Next step

- Talk to your *UU-vejleder* (youth guidance counselor) — they can help you explore your options.
- Visit open house days at local STX, HHX, HTX, HF, or VET schools.
- Try out a *brobygning* (bridging course) or *praktik* (internship) to test a path.

If you'd like, I can help you:

- ✨ Explore careers that match your interests
- ✨ Compare specific programs near where you live
- ✨ Draft a plan for the next few years

Do you already have some areas you're interested in (e.g., science, art, business, technology, helping people)?
