

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Dominica. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question, and it's fantastic that you're thinking carefully about your next step! Since you've just finished primary school (which in Denmark usually means *folkeskole*, up to 9th or 10th grade), you're at the stage where you can choose between different upper secondary education paths. Let's break it down based on your situation, strengths, and possibilities:

Common paths after primary school in Denmark

1 STX (Alment Gymnasium)

- Broad academic education focusing on general subjects like science, humanities, languages, and social studies.
- Good if you want to keep your options open for university later.

2 HHX (Handelsskole / Business College)

- Focus on business, economics, and marketing.
- Suitable if you're interested in commerce or entrepreneurship.

3 HTX (Teknisk Gymnasium)

- Technical and scientific subjects (technology, natural science).
- Good if you like engineering, IT, or science.

4 EUX / EUD (Erhvervsuddannelser)

- Vocational education combined with practical work placements.
- EUX gives both a vocational qualification and the right to apply to university.
- Great if you want to learn a trade (e.g. carpenter, electrician, chef) or combine practical work with academics.

5 IB (International Baccalaureate)

- English-language education with international focus.
- Good if you're thinking about studying or working abroad in the future.

How to choose?

Consider:

- ✓ What subjects do you enjoy the most? (math, languages, science, art, business?)
- ✓ Do you like academic study, hands-on learning, or a mix?
- ✓ Are you considering university, or would you rather start working earlier?
- ✓ Do you want opportunities to study or work internationally?

💡 My recommendation based on what you shared

Since you are fluent in Danish and grew up here, all options are open for you. But since you also have Caribbean roots, you might enjoy opportunities that keep doors open internationally too.

➡ If you want flexibility + university access:

- 👉 **STX** (if you're unsure exactly what you want and want a broad education)
- 👉 **IB** (if you'd like a more international environment and perhaps consider studying abroad one day)

➡ If you like business or entrepreneurship:

👉 **HHX**

➡ If you enjoy technology, science, or practical problem solving:

👉 **HTX** or **EUX**

➡ If you want to work earlier + get a trade + possibly also qualify for higher education:

👉 **EUX**

✨ Next steps

- Visit open house events at different schools (often in January/February)
- Talk to a school counselor (*uddannelsesvejleder*) — they can help you map your interests
- Try a "brobygning" program (short trial stays at different schools)

If you tell me a bit more about what subjects you like best, or what kind of future you imagine (university, starting work, moving abroad, etc.), I can give you a more tailored recommendation!

Would you like help making a plan? 😊
