

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Ecuador. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish.

What educational path would you recommend for me?

That's great that you're thinking carefully about your next steps! Since you've just finished primary school in Denmark (I assume you mean *folkeskole* or 9th grade), you have several good options ahead. Let's break it down so you can think about what fits *you* best.

First, think about your goals and interests

Ask yourself:

- Do I like academic subjects and want to study at university later?
- Am I more interested in practical, hands-on work?
- Do I want to start working as soon as possible, or am I happy to study for several more years?

Your main educational options after folkeskole in Denmark

Gymnasiale uddannelser (upper secondary school — 2-3 years; leads to higher education)

- **STX (alment gymnasium)** – broad academic education; lots of subjects like history, languages, science.
- **HHX (handelsgymnasium)** – focus on business, economics, marketing.
- **HTX (teknisk gymnasium)** – focus on technology, science, IT.
- **HF** – shorter (2 years), more practical academic path (usually for slightly older students, but you can apply at 16).

Erhvervsuddannelser (vocational education and training / apprenticeship)

- Combines school + practical work experience.
- You learn a trade or profession (e.g. carpenter, chef, electrician, hairdresser, social and health care worker).
- Often takes 3-4 years, but you earn a small salary during apprenticeship.

What could suit you?

Since you're fluent in Danish and have a multicultural background (which is a great strength!), think about:

- If you enjoy academic subjects and want to keep doors open for university → STX, HHX, or HTX could be great.
- If you like business, languages, or dream of working internationally → HHX could fit.
- If you like technology, design, or science → HTX is strong.
- If you're more practical and want to learn a trade or start earning earlier → an *erhvervsuddannelse* could be the right fit.

My recommendation

 If you're unsure, I'd suggest:

- Visiting some *gymnasium* and *erhvervsskole* open house days (*åbent hus*).
- Talking to a school guidance counselor (*UU-vejleder*). They can help you map out what suits your interests.
- Considering a *brobygning* or *praktik* week (where you can try different programs).

Extra tip

With your Ecuadorian heritage, you might think about choosing an education that lets you build on your language skills (like Spanish) or something that could open doors internationally (e.g. HHX, STX with languages).

If you tell me more about your interests — for example, do you prefer math, science, arts, sports, helping people, technology, business, or something else? — I can help suggest a more specific path!
