

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Eritrea. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing about yourself — it sounds like you're at an exciting point in your life with many opportunities ahead! I can help guide you based on the Danish education system, your background, and potential goals. Let's break it down:

Your Options After Primary School (Folkeskole)

In Denmark, after primary school (typically after 9th or 10th grade), you generally choose between:

Gymnasiale uddannelser (General upper secondary education)

If you want to keep the door open for university later, these are common paths:

- **STX (Studentereksamen)** – focuses on general academic subjects (good for university preparation in humanities, sciences, social sciences).
- **HHX (Higher Commercial Examination)** – focus on business, economics, and marketing.
- **HTX (Higher Technical Examination)** – focus on science, technology, and engineering.
- **HF (Higher Preparatory Examination)** – shorter program (2 years), often for those who took 10th grade or want a more flexible path to higher education.

Erhvervsuddannelse (Vocational education and training, EUD)

If you want to learn a trade or profession (e.g., electrician, carpenter, hairdresser, health care assistant), this is a great hands-on path. You typically split time between school and apprenticeship.

Kombinerede forløb (EUX)

This combines vocational training with general upper secondary education — great if you want practical skills **and** keep the door open for university.

What to consider when choosing

What are your interests?

Do you enjoy academic subjects like languages, science, business, or history? Or are you more drawn to practical work where you build, create, or work with your hands?

Do you think you'll want to go to university later?

If yes, a gymnasial path (STX, HHX, HTX, HF) or EUX could be better.

If no, vocational training could help you start working sooner.

How do you prefer to learn?

- Enjoy studying, writing, exams → Gymnasial
- Prefer doing, making, and practical experience → Vocational

Your unique strengths

- You're fluent in Danish and have cultural knowledge of both Denmark and Eritrea — this can be a big strength in fields like international business, healthcare, social work, education, or public service.
- Being bilingual or bicultural could open opportunities in jobs that value intercultural skills.

✨ Example scenarios

- **You're interested in business & global connections:** → Consider **HHX**
- **You like science, technology or engineering:** → Consider **HTX**
- **You enjoy broad academic subjects and want flexibility:** → Consider **STX**
- **You want to learn a trade (e.g., electrician, chef) but also maybe study later:** → Consider **EUX**
- **You want to start working as soon as possible in a skilled trade:** → Consider **EUD**

Next steps

 I recommend:

- Visiting open house events ("Åbent Hus") at local gymnasiums and vocational schools.
- Talking to a **UU-vejleder** (youth guidance counselor) — they can help you explore options and even arrange internships or short visits to schools.
- Thinking about your favorite subjects, hobbies, and the type of work environment you imagine for yourself.

👉 If you tell me more about your interests (e.g., favorite subjects, hobbies, dream jobs), I can give you a more tailored recommendation! Would you like that? 😊
