

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Estonia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background—you're at an exciting turning point! In Denmark, after finishing **primary school (folkeskole)**, you typically have several main **educational options**, depending on your interests, academic strengths, and future goals.

Here's a breakdown of the main paths and some recommendations based on your situation:

1. Gymnasium (STX, HHX, HTX, HF) – Academic Upper Secondary Education

If you're interested in further academic studies and possibly university later, gymnasium is the usual next step.

- **STX (Almen studentereksamen):** Focuses on general subjects like languages, sciences, social studies, etc. Good for broad university options.
- **HHX (Højere handelseksamen):** Business-oriented. Focuses on economics, international trade, etc. Ideal if you're interested in business or finance.
- **HTX (Højere teknisk eksamen):** Focuses on science, technology, and engineering. Great if you're into math, tech, or design.
- **HF (Højere forberedelseksamen):** Shorter (2 years), more practical. Often used for people who want to continue to a specific education (like nurse, teacher, police).

 **Recommendation:** If you like school and are considering university in the future, **STX** is the most flexible and widely accepted. **HHX** or **HTX** could be great if you already have a specific direction (like business or tech).

2. EUD – Vocational Education and Training

If you're more hands-on or want to start working earlier, EUD programs prepare you for a trade (carpenter, electrician, chef, hairdresser, etc.).

- Combines school with apprenticeship (praktikplads).
- You can still go on to further education later if you want.

 **Recommendation:** If you already know you like practical work and want to enter the workforce sooner, this is a great and respected option in Denmark.

3. EUX – Vocational + Academic Combo

This combines **vocational training** with **general upper secondary subjects**—you get both practical skills and a qualification that allows you to apply to university.

💡 **Recommendation:** Great if you're not sure whether you want to work or study more later—you keep both doors open.

Bonus Tip (Cultural Background)

Being fluent in Danish and having Estonian roots can be a **huge asset**:

- You could look into **international studies** later, or work with **language, communication, or cultural exchange**.
- HHX or STX with language and international focus could be especially fitting.

✅ **Final Thought: What to Ask Yourself**

- Do I enjoy studying theory and writing? (→ Gymnasium)
- Do I prefer hands-on work and learning by doing? (→ EUD/EUX)
- Do I want to go to university someday? (→ STX, EUX, HHX, HTX)

If you tell me a bit more about:

- Your favorite school subjects,
- What kind of work you can imagine doing,
- Or whether you see yourself going to university,

...I can help you narrow it down even further!
