

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Estonia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

It's great that you're thinking carefully about your next steps! Since you're 16, fluent in Danish, and have completed primary school in Denmark, you have several good options depending on your interests, strengths, and future plans. Let's break it down so you can make an informed choice.

Main educational options after primary/lower secondary school (folkeskole / 9. klasse / 10. klasse)

In Denmark, most students choose between these main types of upper secondary education:

Gymnasiale uddannelser (general upper secondary education)

These prepare you for higher education (university or university college).

- **STX (Almen studentereksamen)**
Focus: broad general education — humanities, sciences, social studies.
Good if: you like academic subjects and want a flexible path to university.
- **HHX (Højere handelseksamen)**
Focus: business, economics, languages.
Good if: you're interested in business, trade, marketing, or international work.
- **HTX (Højere teknisk eksamen)**
Focus: technology, natural sciences, technical subjects.
Good if: you like science, tech, engineering.
- **HF (Højere forberedelseksamen)**
Focus: shorter, more practical 2-year program, often chosen by those who want quicker access to professional higher education or need a fresh start.

Erhvervsuddannelser (vocational education and training / VET)

- Combines school and paid apprenticeship.
- Leads directly to a job as a skilled worker, but you can also take routes to higher education (e.g. erhvervsakademi).
- Examples: electrician, carpenter, chef, hairdresser, IT-supporter, graphic technician.
- Good if: you like practical learning and want to start earning while learning.

Combination programs

- **EUX:** Combine a vocational education with a gymnasium-level exam.
Good if: you want both practical skills and the option for higher education.

How to decide?

Ask yourself:

- What subjects do I enjoy most? (e.g. languages, science, business, arts, hands-on work?)
- Do I prefer practical learning or more theoretical, classroom learning?
- Do I want to go to university later, or start working sooner?

Bonus considerations given your background

- Your bilingual/Estonian background could be a strength in international business, EU-related fields, or language studies.
- HHX could be interesting if you're drawn to international trade/business.
- STX or HTX would keep more doors open if you're not sure yet.

Next steps

- Visit the educational institutions (open house / info sessions).
- Talk to a guidance counselor (Studievalg or Ungdommens Uddannelsesvejledning - UU).
- Consider doing a 10th grade year if you want more time to explore.

If you'd like, tell me:

- 👉 What subjects do you enjoy most?
- 👉 Do you already have a career idea (even a loose one)?
- 👉 Would you prefer to study more or start working earlier?

I can help narrow it down even further! 🚀
