

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Estonia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question, and it's excellent that you're thinking carefully about your next steps! Since you're 16, just finished primary school (folkeskolen), and are fluent in Danish, you have several good options in Denmark's education system. Let's break it down based on your interests, strengths, and future goals.

Main educational paths after primary school in Denmark

At this stage, you typically choose between:

General upper secondary education (gymnasial uddannelse)

Good if you:

- Want to go to university later
- Like academic subjects (math, languages, science, humanities, etc.)
- Enjoy studying and theoretical learning

Options include:

- **STX (studentereksamen)** – broad academic program
- **HHX (higher commercial examination)** – business, economics, marketing
- **HTX (higher technical examination)** – technology, science, IT
- **HF (higher preparatory examination)** – shorter (2 years), for those wanting a more practical/academic mix

Vocational education and training (erhvervsuddannelse / EUD)

Good if you:

- Prefer practical, hands-on learning
- Want to start working earlier or in a specific trade (e.g. electrician, carpenter, chef, healthcare)
- Like combining school with apprenticeships

This path can also lead to further education (e.g. erhvervsakademi, professionshøjskole).

Combination programs

- **EUX** – combine vocational training with gymnasial level subjects → both a trade qualification and eligibility for university

Questions to help you decide

- ✓ Do you like academic/theoretical learning, or are you more interested in practical work?
- ✓ Do you already have a career dream (e.g. doctor, engineer, carpenter, designer, entrepreneur)?
- ✓ Do you enjoy working with people, machines, computers, ideas?

My general recommendation

Since you've completed primary school and speak Danish fluently:

- If you want to keep your options open: **STX** or **EUX** could be a smart choice.
- If you already know you want a trade or practical career: **EUD** or **EUX**.
- If you love business and economics: **HHX**.
- If you love science/technology/IT: **HTX**.

With your Estonian background

Your bilingual or bicultural background is a strength! You might consider paths where language skills, international outlook, or cultural understanding are valued — e.g. international business (HHX), languages (STX), or something that could give you the chance to work across Denmark and Estonia in the future.

Next step

If you want, you can tell me:

- What subjects you enjoy most
- What kind of job or field interests you
- Whether you prefer theory or practice

...and I can help narrow it down further!

Would you like help finding specific schools or programs near where you live in Denmark?
