

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Eswatini. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — that really helps in giving you a solid answer. Since you've just finished primary school in Denmark (which usually ends around 9th or 10th grade, depending on your track), you're now at a key point in the Danish education system where you can choose among several paths. Here are your main options, along with some guidance to help you choose the best fit:

1. Gymnasium (General Upper Secondary Education)

This is a good option if:

- You're interested in academic subjects like languages, science, math, or social studies.
- You might want to go to university later.

Types:

- **STX** (Almen studentereksamen): Broad academic focus.
- **HHX** (Handelsskolens studentereksamen): Business and economics focus.
- **HTX** (Teknisk studentereksamen): Focus on technology and science.
- **HF** (Højere forberedelseseksamen): Shorter (2-year) general education, good if you're more mature or want a faster path.

✓ *Best if you're still deciding what you want long-term or aiming for university.*

2. EUD – Erhvervsuddannelse (Vocational Education and Training)

This is a good option if:

- You prefer hands-on work and want to start a career faster.
- You're interested in trades like carpentry, electrician, healthcare, culinary arts, etc.

You'll get a mix of school and apprenticeship (praktik) in a real job.

✓ *Best if you're practical-minded and want a clear career path without going to university.*

3. EUX – Vocational + Academic Hybrid

This combines vocational training (like EUD) **with** subjects from gymnasium.

You graduate with both:

- A vocational qualification **and**
- A studentereksamen (so you can still go to university)

✓ *Great if you want job-ready skills but also want to keep the door open for university.*

✨ Which path fits you?

Ask yourself:

- Do I enjoy academic subjects and studying for exams? → **Gymnasium (STX/HHX/HTX)**
 - Do I prefer learning by doing and working with my hands? → **EUD**
 - Do I want a mix of practical skills and academic learning? → **EUX**
 - Am I unsure but want to keep as many doors open as possible? → **STX or EUX**
-

🔄 A few more tips:

- **Talk to a UU-vejleder (Youth Guidance Counselor)** – every kommune in Denmark has one, and they'll help you explore your interests.
 - **Visit schools** during their open house days (åbent hus).
 - **Try a "brobygning" program**, where you can test different schools for a week or two before deciding.
 - **Think about your passions:** what subjects do you love? What kind of life do you want in 5–10 years?
-

If you want, I can help you narrow it down based on your interests — just tell me what you enjoy doing or subjects you like (e.g. science, tech, business, helping people, creativity, etc.).
