

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Eswatini. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

It's great that you're reflecting thoughtfully on your next step! In Denmark, after finishing primary school (folkeskole), you have several good options depending on your interests, strengths, and future goals. Since you're fluent in Danish and have completed your primary education here, you have access to all the usual educational pathways. Let's look at your main options:

Youth Education Paths (Ungdomsuddannelse)

1 Gymnasiale uddannelser (General upper secondary education)

These prepare you for higher education (university or academy) and offer broad knowledge in different subjects. Main types:

- **STX (Alment gymnasium)** – Focus on humanities, science, and social science.
- **HHX (Handelsgymnasium)** – Focus on business, economics, and international trade.
- **HTX (Teknisk gymnasium)** – Focus on technology, natural science, and innovation.
- **HF (Højere forberedelseseksamen)** – A 2-year program (instead of 3 years like the others), more practical, good if you want a shorter path to higher education.

 **Good for you if:** You enjoy academic subjects, want to go to university, and aren't sure what field yet.

2 Erhvervsuddannelser (Vocational education and training - VET / EUD)

A mix of school and paid apprenticeship (praktik) in a company. Leads directly to skilled work in areas like:

- Electrician
- Carpenter
- Hairdresser
- Chef
- Healthcare assistant
- IT supporter

 **Good for you if:** You like hands-on work, want to start earning earlier, and are interested in specific trades or technical skills.

Kombinerede forløb

- **EUX:** Combines VET with gymnasial-level subjects so you get both a vocational qualification and the right to apply to university.
- **10. klasse:** Optional extra year to improve your grades, clarify your interests, or prepare better for youth education.

👉 **Good for you if:** You want to keep both doors open — vocational training + future higher education.

How to decide?

- ✓ **Think about what subjects or activities excite you.** Do you like science, technology, arts, working with people, or working with your hands?
- ✓ **Talk to your school counselor (UU-vejleder)** — they can help you explore options.
- ✓ **Visit open house events (åbent hus)** at local gymnasiums or vocational schools to get a feel for the environment.
- ✓ **Consider future plans.** Do you want to go to university eventually? Or would you prefer to get a profession earlier and possibly study later?

Your background

Your roots from Eswatini could be a strength if you are interested in international perspectives — for example, HHX (business) or STX (social science line) could tie in well if you want to work in global relations, business, or development work.

Example educational routes you might consider:

- **STX or HHX** if you enjoy academic subjects and want university options.
- **HTX** if you are drawn to technology and science.
- **EUX** if you want a vocational skill + keep the door open for further studies.
- **EUD** if you already know you want to be, for example, an electrician, chef, or IT supporter.

If you'd like, I can help you:

- 👉 Map out specific programs near where you live
- 👉 Suggest paths that fit certain interests (e.g., technology, art, social studies, business)
- 👉 Draft a plan for how to explore your options

Would you like that? Or can you tell me more about your interests? 😊
