

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Ethiopia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing that about yourself — it sounds like you're at an exciting point in your life! In Denmark, after finishing primary school (folkeskole, typically 9th or 10th grade), you have several good options depending on your interests, strengths, and future goals. Let's break it down:

🎓 Main educational paths after primary school

Here are the most common routes:

1 Gymnasiale uddannelser (Upper Secondary Education – academic track)

If you enjoy academic subjects and think you might want to go to university one day, one of these might suit you:

- **STX (studentereksamen)** – Broad, with focus on humanities, sciences, and social sciences.
- **HHX** – Focus on business, economics, and international trade.
- **HTX** – Focus on technology, natural sciences, and innovation.
- **HF** – Shorter (2 years), more practical/theoretical mix, for students who prefer a less traditional route to higher education.

2 Erhvervsuddannelser (Vocational Education and Training – EUD/EUX)

If you prefer hands-on learning or want to start working sooner, you could:

- Choose an **EUD** program that prepares you for specific trades (carpenter, chef, hairdresser, electrician, etc.).
- Or **EUX**, which combines vocational training with a general upper secondary exam — so you can work *and* keep the door open for higher education.

3 Other options

- **10th grade:** Some students choose an extra year to mature academically, explore subjects, or attend an efterskole (boarding school with focus areas like sports, music, design, etc.).
- **International programs:** If you're interested in strengthening English skills or international opportunities, there are IB (International Baccalaureate) or international classes in some cities.

💡 How to choose?

👉 Ask yourself these questions:

- Do I like academic subjects and theoretical work?
- Do I prefer practical, hands-on tasks?
- Am I interested in going to university or working sooner?
- Are there subjects I feel passionate about (science, languages, business, tech, arts)?
- Do I want an international perspective?

👉 **Consider visiting open houses / orientation meetings (intromøder):**

These events at gymnasier and vocational schools can give you a better feel for the environment.

🌟 **My suggestion (based on what you've shared)**

Since you're fluent in Danish and grew up in Denmark, you have all doors open. If you're not sure yet:

✅ **STX or HHX** could give you a broad academic foundation while you explore interests.

✅ **EUX** if you want a practical skill *and* academic options.

✅ **10th grade (perhaps at an efterskole)** could give you time to reflect and grow, especially if you want a break before deciding.

🌱 **Final tip**

Whatever you choose now doesn't lock you in forever. Denmark's system is flexible, and you can change direction later. If you want, I can help you:

- explore specific schools or programs near where you live
- make a pros/cons list
- or even think about long-term career ideas

Would you like help with that? And do you have a sense of what subjects or activities you enjoy most?
