

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Fiji. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and important question — it's fantastic that you're thinking ahead about your educational journey! Since you're in Denmark, let's break down your options and considerations, and I'll suggest paths based on your interests, strengths, and possible career goals.

📌 Educational paths after primary school in Denmark

After primary school (folkeskole), you usually choose one of these main routes:

1 Gymnasiale uddannelser (Upper secondary school – academic focus)

- **STX** (studentereksamen) – broad academic subjects (humanities, natural science, social science).
- **HHX** (business upper secondary school) – focus on business, economics, and international studies.
- **HTX** (technical upper secondary school) – focus on natural sciences, technology, and innovation.
- **HF** (2-year general upper secondary school, often for older students or those wanting a shorter program).

✓ Good if you're aiming for university or want to keep doors open to many higher education opportunities.

2 Erhvervsuddannelser (Vocational education and training – VET)

- Combines school and apprenticeship with a company.
- You train for a specific trade (e.g. carpenter, chef, electrician, social care assistant).

✓ Good if you prefer practical, hands-on learning and want to work directly after your education, though some programs also let you continue to higher education.

3 Kombinerede løsninger (e.g. eux)

- A mix of vocational education and upper secondary level so you can both learn a trade and qualify for higher education.

✓ Good if you want practical skills but also want to keep the option of university.

🕒 What should you consider when choosing?

Since you're fluent in Danish and have a multicultural background (which is a strength!), think about:

Printed using [ChatGPT to PDF](#), powered by PDFCrowd [HTML to PDF API](#).

- **What subjects interest you most?** (e.g. science, languages, business, arts, technology)
 - **Do you like theoretical/academic work or practical/applied learning?**
 - **Do you want to study further at university, or would you prefer to start working sooner?**
 - **Are you interested in international opportunities? Your Fiji-Danish background could be valuable in business, diplomacy, or global organizations.**
-

☀️ Example recommendations

- If you love science, languages, or social studies → **STX**
 - If you like business, economics, or international trade → **HHX**
 - If you like technology, innovation, and science → **HTX**
 - If you want practical skills + future study options → **EUX**
 - If you want to start working in a trade soon → **Vocational education (EUD)**
-

🌱 Next steps

- Visit open house events (åbent hus) at local gymnasier and vocational schools.
 - Talk to your school counselor (uddannelsesvejleder).
 - Try out **brobygning** programs (short trial courses) to get a feel for different options.
 - Think about where you see yourself in 5-10 years — do you dream of university, starting a business, traveling, helping people, or something else?
-

👉 If you want, tell me a bit about:

- What subjects you enjoy most
- Whether you prefer practical or academic work
- Any dream jobs you have

I can then give you a more personalized recommendation! 🚀
