

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Finland. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! At 16 in Denmark, you're at a key point in your educational journey. Since you've just finished **Folkeskole (primary and lower secondary school)**, your next step is typically one of the **youth education programs (ungdomsuddannelser)**. Which one you choose depends on your interests, goals, and how you like to learn. Here's a breakdown of your main options:

1. Gymnasiale uddannelser (Academic Upper Secondary Education)

These programs are great if you're considering university later on.

- **STX (Almen studentereksamen):** Broad and academic. Focuses on languages, humanities, social sciences, and natural sciences.
- **HHX (Højere handelseksamen):** Focuses on business, economics, and international relations.
- **HTX (Højere teknisk eksamen):** More technical/scientific. Great if you're into technology, IT, or engineering.
- **IB (International Baccalaureate):** Taught in English, internationally recognized. Good if you're interested in studying abroad or want an international environment.

Best for: University-bound students who enjoy academic work and want a broad foundation.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These are job-oriented and combine school with apprenticeships.

- You learn a specific trade (e.g. electrician, carpenter, chef, hairdresser, IT technician).
- You earn while you learn during your internship.
- Takes 2–4 years depending on the path and specialization.

Best for: Hands-on learners who want to work sooner and maybe even start their own business one day.

3. Other options

- **Kunstneriske og kreative uddannelser:** If you're into art, music, or design, you can explore schools that focus on creative industries.

- **Efterskole or højskole** (optional): A year or half-year away to reflect, grow socially, and focus on specific interests.
-

Important Questions to Ask Yourself:

- Do you enjoy academic subjects or prefer practical, hands-on work?
 - Are you thinking about university or starting a career sooner?
 - Do you want to stay in Denmark or maybe study/work abroad in the future?
 - Are you interested in business, science, tech, art, or something else?
-

BONUS: Finnish Connection

Since your parents are from Finland, you may have the option of studying in Finland later (university or even high school). Finnish universities often have programs in English, and as a Nordic citizen, you can study there for free.

My Suggestion

If you're unsure but want to keep options open:

STX or IB is a great path. You'll get a broad education and can later decide if you want to go to university or something else. If you're more business- or tech-minded, **HHX** or **HTX** might suit you better.

If you already know you like hands-on work and want to start a job earlier:

EUD is a smart and respected path in Denmark with good job prospects and opportunities for further education later.

Would you like help narrowing it down based on your interests or strengths?
