

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Finland. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing about your background — that's helpful context! Since you've just finished primary school in Denmark and are considering your next step, let's break down your options and what you might want to think about when choosing.

Your Main Educational Paths in Denmark

After primary school (*folkeskole*), you typically have these options:

1 Gymnasiale uddannelser (Upper Secondary Education / High School)

If you're aiming for university eventually or want a broad, academic education, you could choose:

- **STX (Studentereksamen):** A general upper secondary education focusing on a mix of humanities, natural sciences, and social sciences.
- **HHX (Higher Commercial Examination):** Focus on business, economics, and international trade.
- **HTX (Higher Technical Examination):** Emphasis on science, technology, and engineering.
- **HF (Higher Preparatory Examination):** A 2-year program, often for those who want a shorter route or more flexible pathway to higher education.

2 Erhvervsuddannelse (Vocational education and training / VET)

If you want to learn a trade or start working sooner:

- You combine school and apprenticeship with a company.
- You can train in areas like carpentry, electrician work, chef, healthcare assistant, mechanic, etc.
- VET can also give access to further education (e.g., *EUX* combines VET and general upper secondary exams so you can go to university later).

Questions to Ask Yourself

Here are some things to reflect on to help guide your choice:

-  **Interests:** Do you like academic subjects (e.g., science, languages, history) or practical/hands-on work (e.g., fixing things, creating, caring for people)?

- 🏠 **Future plans:** Are you thinking about university later? Or would you rather start working earlier?
- 💬 **Language:** Since you're fluent in Danish, all these options are open to you. But with your Finnish background, maybe international opportunities interest you (e.g., HHX might have an international angle)?
- 🧠 **Learning style:** Do you prefer theory, books, and exams? Or more practical learning and working with your hands?

⚡ Example Scenarios

- If you're interested in science/technology → **HTX**
- If you want a general education that keeps many options open → **STX**
- If you're interested in business or international trade → **HHX**
- If you want to get a trade qualification and maybe start earning sooner → **VET / EUX**
- If you're unsure or want flexibility → **STX** or **HF** (depending on how much time you want to spend)

✅ Recommendation

👉 Since you're still exploring, **STX** is often a safe and flexible choice. It keeps almost all doors open for future university studies while you figure out your interests.

👉 If you already feel drawn to something specific — e.g., technology (HTX) or business (HHX) — you could choose one of those.

👉 If you want to work sooner and like practical learning, consider **VET** or **EUX**.

💡 **Tip:** Many schools offer orientation days (*brobygning*). It's a great idea to visit a few schools and programs before you decide.

If you want, I can help you:

- Compare specific programs
- Suggest schools in your area
- Plan your next steps

Would you like help with that? Or can you tell me a bit more about your interests? 😊
