

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Finland. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and important question — and it's fantastic that you're thinking carefully about your next steps! Since you've just finished primary school (which in Denmark typically means *folkeskole* up to 9th or 10th grade), you now have several options depending on your interests, strengths, and future goals. Let's break it down:

🎓 Main educational paths in Denmark after primary school

1 Gymnasiale uddannelser (upper secondary education)

If you're interested in continuing general education and possibly going to university later, these are good choices:

- **STX (studentereksamen)** – a broad academic program with focus on humanities, social sciences, and natural sciences.
- **HHX (higher commercial examination)** – focus on business, economics, and international topics.
- **HTX (higher technical examination)** – focus on technology, natural sciences, and IT.
- **HF (higher preparatory examination)** – a shorter, more practice-oriented path (usually 2 years), good for people who want flexibility or didn't take 10th grade.

👉 *Best if:* You like school subjects and want to keep many options open for higher education.

2 Erhvervsuddannelser (vocational education and training / VET)

If you want to combine practical work and study, you can choose an apprenticeship + school-based learning program. Examples:

- Crafts (carpenter, electrician, plumber, etc.)
- Culinary (chef, baker)
- Health and care (social- and healthcare assistant)

👉 *Best if:* You want to learn a profession and maybe start working sooner or continue to higher vocational studies.

3 Kombinationsuddannelser

There are also programs where you can combine general upper secondary and vocational education (like EUX).

👉 *Best if:* You want both a trade and the possibility to go to university.

🕒 How to choose?

Here are some things to consider:

- ✅ **What subjects do you enjoy most?** (e.g., languages, science, business, arts, technology?)
 - ✅ **Do you prefer practical, hands-on learning or academic studies?**
 - ✅ **Do you see yourself going to university, or would you prefer entering the job market earlier?**
 - ✅ **Would you like an international angle (e.g., focus on languages, study abroad later, use your Finnish background)?**
-

🌍 Other considerations

- Since you have Finnish roots, you might look at programs that offer extra language options or international exchange opportunities.
 - Many upper secondary schools (*gymnasier*) have special study lines (e.g., science, languages, media, global studies).
 - You could also consider a 10th grade year (efterskole or local 10th grade) if you want extra time to decide and try something different.
-

⚡ My recommendation

Since you're fluent in Danish, have an international background, and are at the starting point of your decision:

- **STX** with an international or language line could suit you if you enjoy broad academic subjects and want to keep options open.
- **HTX** if you are into technology, science, or IT.
- **HHX** if business, economics, or marketing interests you.
- **EUX** if you like practical work but also want access to university later.

If you tell me more about:

- what subjects you like most,
- how you prefer to learn (books vs hands-on),
- your hobbies or dreams for the future,

I can give you an even more tailored suggestion!

If you want, I can also help you explore schools near where you live or specific programs that fit your profile. Do you want that? 😊
