

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Gabon. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you just finished **primary school** in Denmark (which ends after **9th or 10th grade**, depending on your route), your next step is typically to choose between several upper secondary education options, depending on your interests, goals, and strengths.

Here's a breakdown of your main options in Denmark after primary/lower secondary school:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are for students who might want to go to **university or higher education** later.

- **STX (Studentereksamen)**
Focus: A broad academic education (humanities, science, social science).
Good if you're unsure what to specialize in yet or want broad opportunities.
- **HHX (Higher Commercial Examination Programme)**
Focus: Business, economics, marketing.
Good if you're interested in working with **business, finance, or entrepreneurship**.
- **HTX (Higher Technical Examination Programme)**
Focus: Technology, science, innovation.
Great if you like **engineering, IT, or science**.
- **HF (Higher Preparatory Examination)**
Focus: A shorter, more compact general education (2 years).
Good if you want a quicker route to **vocational training or university** (often for mature or more practically-oriented students).

✓ Best if you:

- Like studying academically
- Want to go to university
- Are curious and enjoy school subjects
- Want flexibility later

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These are job-focused and mix school with apprenticeships.

You can become things like:

- Electrician, carpenter, mechanic
- Hairdresser, chef, child care assistant
- IT technician, media graphics designer

✓ Best if you:

- Prefer practical learning
- Want to work soon after graduation
- Are hands-on and like to build, create, or help people directly

How to Decide?

Ask yourself:

- Do I enjoy school and studying theoretical subjects?
- Do I already know what I'd like to work with?
- Do I want to work as soon as possible, or study longer?

My Advice for You

Since you're bilingual (Danish + probably French or another language from home), multicultural, and just finished school in Denmark, you already have valuable assets. Here's a tailored suggestion:

Try STX or HHX if:

- You enjoy learning in school and want more time to explore your options.
- You're interested in **society, languages, or business**.

Try EUD if:

- You're eager to work soon or already have a strong interest in a trade.
- You like practical, hands-on work and maybe want to start your own business one day.

If you want, I can help you:

- Compare two specific programs
- Explore careers based on your interests
- Look into local schools or colleges in your area
