

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Gambia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! It's great that you're thinking seriously about your future. In Denmark, there are several solid options after completing primary school (folkeskole), and the best path depends on your interests, strengths, and career goals. Here's a breakdown of your main options and what to consider:

1. Gymnasiale Uddannelser (Upper Secondary Education)

These are academic programs that prepare you for university:

- **STX (Almen studentereksamen)** – General upper secondary school with a broad mix of subjects (humanities, sciences, social sciences).
- **HHX (Højere handelseksamen)** – Focus on business, economics, and marketing.
- **HTX (Højere teknisk eksamen)** – Focus on science, technology, and engineering.
- **HF (Højere forberedelseksamen)** – A shorter (2-year) program, often more flexible, good for mature or more independent learners.

Recommended if:

You enjoy academic subjects and may want to go to university later. STX is a good general choice, HHX for business, HTX for tech/science, and HF if you want a quicker route or need flexibility.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

Combines school and apprenticeship (praktik). You learn a trade and get work experience.

- Examples: Electrician, carpenter, hairdresser, chef, healthcare assistant, etc.
- Can also lead to further education later (e.g., erhvervsakademi or professionshøjskole).

Recommended if:

You like working with your hands, want to earn money while studying, and prefer practical learning. It's also a fast way into a profession.

3. Kombinerede forløb / EUX

A mix of vocational education and academic upper secondary school. You get both a trade and a general education.

- You can both get a job and qualify for university later.
- Longer and more demanding than EUD alone, but opens more doors.

Recommended if:

You want practical training **and** the option to study further later. Ideal if you're unsure between vocational and academic.

So, what should you choose?

Let's match your situation:

Factor	Recommendation
You're fluent in Danish	✅ No language barrier – all options open.
You just finished folkeskole	✅ You're ready for either gymnasium or EUD.
Your parents are from Gambia	🌐 You might value combining your Danish education with international opportunities later – so staying open to university via STX, HHX, or EUX could be smart.
You're 16	⌚ Still early – you can explore and switch later if needed.

My advice:

Unless you **already know** you want to do a trade (like hairdresser, mechanic, chef), I'd suggest:

- ✅ **STX** – if you want a broad education
- ✅ **HHX** – if you're interested in business, economy, or marketing
- ✅ **EUX** – if you want to work with your hands **but also** maybe study at university later

You can also **visit open house events** ("åbent hus") at schools near you or try a **brobygning** course (short try-out programs). It really helps to get a feel for the school environment.

Would you like help finding schools in your area, or exploring what kind of job or subject might fit your personality and interests? I can help with that too!
