

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Ghana. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background — and congrats on finishing primary school! That's a big step. In Denmark, after primary school (folkeskole), you have a few main options depending on your interests, strengths, and future goals. Here's a breakdown of the most common educational paths, and how you might think about them:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

These are academically focused and prepare you for university or other higher education.

- **STX (Almen studentereksamen):** Broad academic education. Great if you like humanities, social sciences, or natural sciences.
- **HHX (Højere handelseksamen):** Focused on business, economics, and international relations. Useful if you're interested in commerce or entrepreneurship.
- **HTX (Højere teknisk eksamen):** Focused on technology, science, and engineering. Good for students into tech or applied sciences.
- **HF (Højere forberedelseksamen):** Shorter (2 years) and more practical. Great if you want a more flexible path to higher education or are unsure.

🟢 *Best for you if:* You enjoy school subjects, want to keep many doors open, and are thinking about university later.

🔧 2. Erhvervsuddannelser (Vocational Education & Training – EUD)

Practical training that leads directly to a job, often with apprenticeships.

- Examples: Electrician, carpenter, hairdresser, mechanic, social and health assistant (SOSU), IT supporter.
- Usually includes both school and hands-on work experience.

🟢 *Best for you if:* You want to work with your hands, learn on the job, and start earning sooner. Great if university isn't your main goal (but you can still go later via *eux*).

🧠 3. EUX (Combination of EUD + Gymnasial Education)

This combines vocational training with the academic level of upper secondary education.

🟢 *Best for you if:* You want job skills *and* the option to go to university later. It's challenging but opens many doors.

Choosing the Right Path

Here are a few questions to help you reflect:

- Do you enjoy theoretical learning (like math, languages, history), or more practical, hands-on work?
- Are you thinking about going to university later?
- Do you have any specific interests already (e.g. technology, business, health, arts)?
- Do you want to start working and earning money sooner?

Additional Tip: Talk to a *UU-vejleder*

In Denmark, you have access to an educational advisor (*UU-vejleder*), who can help you make the best choice based on your interests, grades, and goals. This is a great step to take soon if you haven't already.

Extra Thought: Embrace Your Background

Being fluent in Danish and having Ghanaian roots can be a real strength — especially in international business, diplomacy, health care, education, and technology. If you're interested, you could later explore how to connect Denmark and Ghana through your career.

If you tell me more about what you enjoy or think about doing in the future, I can give you more personal advice. Want help figuring that out?
