

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Greece. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that! Since you've just finished primary school in Denmark and you're at an important turning point, let's go over your options and some guidance based on your situation.

First, Key Things to Consider:

1. **Your Interests:** What subjects or activities do you enjoy? (e.g. science, art, working with people, hands-on tasks)
2. **Career Ideas:** Do you have a dream job or general direction in mind? (e.g. university, a trade, working in healthcare, business, etc.)
3. **Learning Style:** Do you prefer academic work, practical hands-on work, or a mix?

Your Educational Options in Denmark After Primary School

In Denmark, after completing **Folkeskole (primary and lower secondary school)**, you typically choose between two main paths:

1. General Upper Secondary Education (Gymnasiale Uddannelser)

These are good if you're considering going to university later.

- **STX (Studentereksamen):** General academic focus (sciences, humanities, social studies).
- **HHX (Higher Commercial Examination):** Focus on business, economics, international trade.
- **HTX (Higher Technical Examination):** Focus on technology, science, innovation.
- **HF (Higher Preparatory Examination):** 2-year alternative for those who want a shorter, more flexible path to university.

✓ Good for you if:

- You like school subjects and want more academic options.
- You're considering university or higher education.

2. Vocational Education and Training (Erhvervsuddannelser, EUD)

These combine school and apprenticeships in real companies.

- Choose from many tracks: electrician, chef, hairdresser, healthcare worker, mechanic, etc.

- Usually 3–4 years, with paid internships/apprenticeships.

✓ Good for you if:

- You prefer hands-on work.
- You want to start earning sooner and learn a trade.
- You're not sure about going to university.

With Your Greek Background

- **Language advantage:** If you speak Greek or have cultural ties, that could open future opportunities in translation, international business, or diplomacy.
- Consider exchange programs or studies abroad later—being bilingual is a strength!

What I'd Recommend (if you're unsure):

If you enjoy learning and think you might want to go to university or keep your options open:

 **Go for STX, HTX, or HHX**, depending on your interests.

But if you're more hands-on and eager to get into work, and maybe not that interested in more classroom learning:

 **Start a vocational program** in a field that genuinely interests you.

Want to Figure It Out Better?

Ask yourself:

- Do I enjoy science/tech, social studies, or business?
- Do I want to go to university?
- Do I prefer practical tasks or academic ones?
- Am I motivated by learning, working, or earning?

If you'd like, I can help you explore specific programs or schools in your area, or make a small quiz to help match your interests.

Would you like help figuring out your interests more deeply?
