

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Grenada. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that — you're at an exciting point in your life, and it's great you're thinking ahead. Since you're in Denmark, just finished primary school (which usually means 9th grade or possibly 10th), you have several good educational options depending on your interests, goals, and how you like to learn.

Here's a quick overview of your main paths after primary school in Denmark:

🎓 1. Gymnasiale Uddannelser (Upper Secondary Education – Academic Track)

These are ideal if you're thinking about university later.

- **STX (Alment Gymnasium):** Broad academic program, good if you're interested in humanities, natural sciences, or social sciences.
- **HHX (Higher Commercial Examination Programme):** Focus on business, marketing, and economics.
- **HTX (Higher Technical Examination Programme):** Focus on science, technology, and engineering.
- **HF (Higher Preparatory Examination):** Shorter (2 years), often used for more direct paths to specific higher education.

Recommended if:

- You enjoy studying academic subjects.
- You're open to going to university or higher education.
- You like theoretical learning and exams.

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These combine school with practical training (apprenticeships) and lead to skilled jobs.

- Fields like electrician, mechanic, chef, hairdresser, IT supporter, healthcare assistant, and many more.
- You can also take **EUX**, which combines vocational training with academic subjects so you can still go to university if you want.

Recommended if:

- You like hands-on work and learning by doing.

- You want to start earning earlier.
- You're interested in a skilled trade or practical career.

3. 10. klasse (Optional 10th Grade)

If you're unsure or want to improve your grades or explore your options, 10th grade can be a useful transition year.

- Some 10th grade schools focus on preparing for gymnasium or vocational programs.
- Efterskole is also an option for 10th grade – a boarding school year where you also grow socially and personally.

Recommended if:

- You're not quite sure what to choose yet.
- You want more time to decide or mature.
- You want to try something different like music, sports, or international focus.

Questions to Help You Decide

1. Do you like academic subjects like math, science, literature, or history?
2. Do you prefer practical work — using your hands, solving real-life problems, building or fixing things?
3. Are you thinking about going to university one day?
4. Do you want to enter the workforce sooner, or spend more years in school?
5. Do you enjoy group work and projects, or more individual studying?

✨ My Suggestion

Since you speak Danish fluently, are born and raised in Denmark, and have multicultural roots (which is a strength!), you have full access to any educational path. If you have a general interest in academics or are unsure, **STX or HHX** might give you the most flexibility.

But if you already know you like technology, business, health care, or creative fields, a **vocational path with EUD or EUX** could be a great way to get started in a career while still keeping future doors open.

If you tell me more about:

- What subjects or activities you enjoy
- Any jobs or careers you've thought about
- Whether you'd rather study more or start working sooner

...I can give a more personalized recommendation.
