

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Guatemala. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing your background — that helps a lot. You're at a big decision point, and it's great you're thinking carefully about it. Since you've just finished **primary school (folkeskolen)** in Denmark at around age 16, your next step will typically be some form of **youth education (ungdomsuddannelse)**. Here's a breakdown of your main options, along with guidance based on different goals you might have:

🎓 1. Gymnasium (General Upper Secondary Education)

Recommended if you're interested in university later or unsure about your career.

- **STX (Almen studentereksamen)** – Broad academic program; good if you like subjects like literature, languages, history, or science.
- **HHX (Højere handelseksamen)** – Focus on business, economics, and marketing; good for future business or international careers.
- **HTX (Højere teknisk eksamen)** – Focus on science, tech, and innovation; good for engineering or IT paths.
- **HF (Højere forberedelseseksamen)** – A 2-year, slightly shorter and more practical version of STX; can be good if you want a quicker path to further education.

👉 **Good choice if:** You're curious, academically inclined, and want flexibility later (e.g., university or professional education).

🔧 2. Erhvervsuddannelse (Vocational Education and Training - EUD)

Recommended if you want to start working sooner or learn a trade.

- Become a **skilled worker** (e.g., electrician, carpenter, chef, hairdresser, social and healthcare assistant).
- Many programs combine school and paid apprenticeships in real companies.
- You can also take **EUX**, which combines vocational training and general upper secondary education — a smart mix if you want hands-on work *and* the option for university later.

👉 **Good choice if:** You enjoy practical work and want a more direct path to a job with real-world experience.

💡 How to Decide

Think about:

- Do you enjoy academic subjects, or do you prefer hands-on learning?
 - Do you want to go to university someday?
 - Are there specific careers that interest you?
 - Would you like to start working and earning sooner?
-

Bonus: Your Background

Being bilingual and having Guatemalan heritage is a huge plus. It opens doors to:

- **International careers**, especially with HHX or STX with a language focus.
 - **Social work, education, or translation**, especially if you want to help others or work with immigrant communities.
-

Still Not Sure?

You could also consider:

- Taking a **10th grade (10. klasse)** year to explore options.
 - Talking to an **educational advisor (UU-vejleder)** — most schools have one, and they can give tailored help.
-

If you tell me more about what you're interested in — like favorite school subjects, hobbies, or future dreams — I can help you narrow it down further.
