

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Guatemala. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing that—your background gives you some unique strengths to build on. Since you've just finished primary school in Denmark (usually around age 15–16), you're at the point where you choose your upper secondary education. In Denmark, there are several paths you can take, and the best choice depends on your interests, goals, and how you like to learn. Here are the main options:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are more academic and prepare you for university.

a. STX (Studentereksamen)

- Broad, academic focus (humanities, sciences, languages, social sciences).
- Great if you're not sure what to study yet or want a flexible path to university.
- You can tailor your subjects somewhat depending on your interests.

b. HHX (Higher Commercial Examination)

- Focus on business, economics, and international trade.
- Good if you're interested in commerce, marketing, or entrepreneurship.

c. HTX (Higher Technical Examination)

- Focus on science, technology, and innovation.
- Great if you're into IT, engineering, or natural sciences.

d. HF (Higher Preparatory Examination)

- A shorter 2-year program (instead of 3).
- Often used by people who want to start university sooner or change direction.

2. Erhvervsuddannelser (Vocational Education and Training – VET/EUD)

These combine school and paid apprenticeships in a company.

- Great if you want to start working earlier and learn hands-on.
- You can become, for example, an electrician, carpenter, chef, hairdresser, IT-supporter, or more.
- Many EUDs still give access to further education (e.g., erhvervsakademi or professionsbachelor).

3. EUX (Vocational + Academic Combined)

- A mix between gymnasial and vocational education.
- You get a studentereksamen **and** a vocational qualification.
- Takes a bit longer but opens many doors—both to university and work.

How to Choose?

Here are some questions that might help narrow it down:

- Do you enjoy more academic subjects like history, science, or languages? → Consider STX, HTX, or HHX.
- Do you like hands-on work or want to start earning money soon? → Look into EUD or EUD.
- Are you very social, creative, or business-minded? → HHX or creative EUDs (like media, design, gastronomy).
- Are you drawn to IT, programming, or technology? → HTX, or a tech-focused EUD/EUD.

Bonus: Your Background

Being fluent in Danish and having Guatemalan roots is a big advantage. Bilingual and multicultural perspectives are valuable in business, diplomacy, international relations, healthcare, education, etc. So don't hesitate to lean into that in your studies or future career.

My Advice (Based on What You've Shared):

If you're still exploring and want to keep your options open:

- **STX** is a safe and flexible path.
If you have specific interests like:
- **Business** → HHX
- **Technology** → HTX or a tech EUD
- **Working hands-on** → EUD or EUD

If you tell me more about your interests, I can give you a much more personalized recommendation. What subjects do you enjoy most? Any dream jobs or hobbies you're passionate about?
