

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Guinea. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background — you're at an exciting point in your life with many opportunities ahead. Since you've just finished primary school in Denmark (Folkeskole), your next step depends on your interests, strengths, and long-term goals. Here's a clear overview of the main educational paths available to you in Denmark after primary school, and what they might mean for your future:

🎓 1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are great if you're interested in going to university one day.

a. STX (Studentereksamen)

- Focus: General subjects like languages, science, and social studies.
- Duration: 3 years.
- Good if: You're academically inclined and interested in a broad education.

b. HHX (Higher Commercial Examination)

- Focus: Business, economics, and languages.
- Duration: 3 years.
- Good if: You're interested in international business, marketing, or finance.

c. HTX (Higher Technical Examination)

- Focus: Technology, science, and engineering.
- Duration: 3 years.
- Good if: You like innovation, science, IT, or engineering.

d. HF (Higher Preparatory Examination)

- Focus: More practical and shorter (2 years).
- Good if: You prefer a more mature environment or want a quicker path to higher education.

🔧 2. Erhvervsuddannelser (Vocational Education & Training - EUD)

These are ideal if you want to learn a trade or start working sooner.

- Combines school with practical training (apprenticeships).

- You can become a:
 - Electrician, carpenter, mechanic
 - Healthcare worker, hairdresser, chef, etc.
- Duration: 2–5 years depending on the program and job.

You can later build on it with an *EUX* if you also want the option to go to university.

What to Consider When Choosing

Question	Why It Matters
Do you like studying academic subjects?	Then STX, HHX, or HTX might suit you.
Do you enjoy working with your hands or being practical?	Then a vocational education (EUD) could be a good fit.
Are you still unsure about your future job?	Then STX or HF keeps your options open.
Do you like business or tech?	HHX (for business) or HTX (for tech) would match.

My Recommendation Based on What You Shared

Since you're fluent in Danish, have a multicultural background, and just finished primary school in Denmark:

- If you enjoy learning and might want to go to university: **STX** gives you a wide range of options later.
- If you're interested in business and languages: **HHX** could connect well with international opportunities (possibly even between Denmark and Guinea!).
- If you're more practical or want to start earning sooner: **EUD or EUX** lets you get work experience and possibly continue studying later.

Next Step: Talk to an Educational Advisor

Every kommune has **UU-vejledning** (youth guidance counselors). They can:

- Help you explore your interests and goals
- Let you try short internships (brobygning)
- Show you schools and programs in your area

If you'd like, you can tell me:

- What subjects you enjoy most
- Whether you want to go to university or start working sooner
- What kind of job or lifestyle you imagine in the future

And I can help guide you even more specifically.
