

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Guinea. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that! It's great that you're thinking carefully about your future now—it gives you more time and options to shape a path that suits your interests, goals, and strengths.

Since you've just finished **primary school** (Folkeskolen) in Denmark and you're **16 years old**, you're at the point where most students choose between different **youth education programs**. Here are the main paths available to you in Denmark, and what kind of person or career goals they fit best:

1. Gymnasiale uddannelser (Upper Secondary Education)

These are for students who may want to go to **university** later.

Options:

- **STX (Studentereksamen)** – General academic program with a focus on humanities, sciences, or social sciences.
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and marketing.
- **HTX (Højere Teknisk Eksamen)** – Focus on technology, natural sciences, and engineering.
- **HF (Højere Forberedelseseksamen)** – 2-year program for students who want a shorter academic route to certain higher education programs.

Best for you if:

- You enjoy academic subjects.
- You might want to study at a university or professional college later.
- You're still exploring your interests.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

A combination of school and apprenticeship, this leads directly to a profession (e.g., carpenter, electrician, healthcare assistant, hairdresser, etc.).

Best for you if:

- You prefer hands-on work and learning by doing.
- You want to enter the job market quickly with solid skills.

- You're motivated by practical tasks more than theory.

There are also **EUX** programs, which combine vocational training with academic subjects, allowing you to keep university as an option.

3. Other Specialized Paths

Depending on your interests, you can also consider:

- **International Baccalaureate (IB)** – English-language program, good if you want international opportunities.
- **Creative schools** – If you're into design, music, or art.
- **Sports schools** – If you're serious about athletics.

How to Choose: Questions to Ask Yourself

1. **What subjects do I enjoy most?**
2. **Do I want to go to university someday?**
3. **Do I like working with my hands, being creative, or solving theoretical problems?**
4. **Do I want to earn money sooner or study longer?**
5. **Do I feel ready for a demanding academic track, or do I want something more practical for now?**

With Your Background

As someone with roots in Guinea and a Danish upbringing, you might also have strengths like multilingualism, adaptability, or interest in intercultural communication. These could make paths in **international business, social work, healthcare, education, or diplomacy** interesting in the future.

Suggestion

If you're not sure yet, **STX or HHX** might be a good next step—they give you time to explore different subjects while keeping your future options open.

But if you're sure about working in a trade or specific profession, **EUD or EUX** could get you there faster.

Would you like help exploring careers based on your interests? Or are you leaning toward a specific subject like science, business, or healthcare? Let me know, and I can guide you more specifically!
