

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Guyana. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing a bit about yourself — you're at a really important point in your life where you get to choose a direction that matches your interests, strengths, and goals. Since you've just finished primary school in Denmark (so likely finished **9th grade** or **10th grade**, depending on your path), your next steps usually fall into one of the following educational tracks:

Main Options After Primary School in Denmark

1. Gymnasiale uddannelser (Upper Secondary Education) – 3 years

- **STX (Studentereksamen)** – General upper secondary. Focus on academic subjects like languages, history, science.
- **HHX (Højere Handelseksamen)** – Business-oriented. Great if you like economics, marketing, or international business.
- **HTX (Højere Teknisk Eksamen)** – Technology and science-focused. Ideal if you're into IT, engineering, or natural sciences.
- **HF (Højere Forberedelseksamen)** – 2-year program. More flexible, often for students who want to go to university but didn't go the gymnasium route earlier.

2. Erhvervsuddannelse (Vocational Education & Training / EUD) – 1-5 years

- Learn a trade or profession (e.g. electrician, carpenter, chef, health care worker).
- Mix of school and paid internship ("praktik").
- Leads directly to jobs or further vocational specialization.

3. Kombinerede forløb / EUX (Hybrid of Gymnasial + Vocational)

- You get both a vocational education **and** a general upper secondary diploma.
- Great if you want job skills and also want the option to go to university later.

Which Path Should You Choose?

That depends on your **goals**, **interests**, and **learning style**. Here are some questions to guide your decision:

Question	If "Yes", Consider
Do you enjoy academic subjects like literature, science, or history?	STX or HF
Are you interested in business, marketing, or economics?	HHX
Do you like hands-on work or want to start working sooner?	EUD or EUX
Are you good with computers or tech, and enjoy problem solving?	HTX or EUX

Question	If "Yes", Consider
Are you unsure but want to keep university open as an option?	STX or EUX

Cultural Background Note

As someone with roots in Guyana, you bring a multicultural perspective. That can be an **advantage** especially in areas like:

- **International business or diplomacy** (HHX + university)
- **Health and social care** (EUD or HF + further education)
- **STEM or technology** (HTX or EUX)

Denmark needs more young people from diverse backgrounds in all sectors, and you can be part of shaping that.

Suggested Plan (if you're unsure)

If you're not yet sure what career you want:

1. Consider **STX** if you're academic and want broad options.
2. Consider **EUX** if you like learning by doing, but still want access to university.
3. Take a **vejledningssamtale (guidance counseling meeting)** at **Ungevejledningen** in your kommune.
