

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Haiti. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background! It's great that you're thinking carefully about your next steps. In Denmark, after finishing primary school (folkeskole), you have a few solid educational options depending on your interests, strengths, and future goals. Here's a clear breakdown to help you think it through:

## 🎓 Main Educational Paths After Primary School (Folkeskole)

### 1. Gymnasiale uddannelser (Upper Secondary Education) – for academic focus

These are 3-year programs that prepare you for university.

#### Options:

- **STX** (*Studentereksamen*): Broad general education (languages, science, humanities).
- **HHX** (*Handelshøjskoleeksamen*): Focus on business, economics, and marketing.
- **HTX** (*Teknisk eksamen*): Focus on science, technology, and engineering.
- **HF** (*Højere forberedelseeksamen*): Shorter (2 years), more practical/academic mix. Often used as a second chance or for students who prefer a more mature setting.

#### Recommended if:

You enjoy academic subjects and might want to go to university later.

### 2. Erhvervsuddannelser (Vocational Education and Training – EUD) – for hands-on careers

These programs combine school and apprenticeship with real work in companies.

#### Examples of fields:

- Electrician
- Carpenter
- Hairdresser
- Chef
- Healthcare assistant
- IT supporter

#### Recommended if:

You prefer practical learning, want to earn while you learn, and like a faster path to a job.

### 3. Kombineret forløb (EUX) – both vocational and academic

This is a great hybrid: you get both a **vocational education** *and* a **study-qualifying exam** like gymnasiet.

**Example:** Electrician (EUX) → can work as an electrician or go to university later.

#### Recommended if:

You like practical work but also want to keep the option open to study at university.

#### Some Key Questions to Ask Yourself:

- Do I enjoy schoolwork like writing, reading, and studying theories? → Go with **STX, HHX, HTX**, or **HF**
- Do I learn better by doing things with my hands or working in teams? → Consider **EUD** or **EUX**
- Do I want to go to university someday? → Choose **STX, HHX, HTX, HF**, or **EUX**
- Am I interested in business, tech, design, or healthcare? → Choose based on specialization

#### Example Scenarios Based on Interests:

| Interest Area      | Recommended Path             |
|--------------------|------------------------------|
| Science/Math       | HTX or STX                   |
| Business/Economics | HHX                          |
| Art/Literature     | STX                          |
| Want to work fast  | EUD                          |
| Tech + Uni Option  | EUX (e.g., IT supporter EUX) |

#### Bonus Tip (from your Haitian background)

Being bilingual or multicultural is a **huge strength**. Consider international options, language-focused programs, or even future study/work abroad. Your unique background could also be an asset in diplomacy, NGOs, education, or cultural fields.

#### Final Advice

- **Visit open house events** (åbent hus) at local schools to get a feel for each program.
- **Talk to a guidance counselor** (uddannelsesvejleder) – they can help you plan based on your grades, interests, and goals.
- **You don't have to choose your whole life now** – just the next good step.

If you tell me more about your interests (e.g., favorite school subjects, hobbies, career dreams), I can make a more personal recommendation!
