

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Haiti. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's great that you're thinking ahead about your education! Since you just finished primary school in Denmark (which typically ends after 9th grade), your next step depends on your interests, goals, and how you like to learn.

In Denmark, you have several main paths to choose from:

1. Gymnasium (General Upper Secondary Education)

This is the academic route, usually 3 years long, and leads to the **STX**, **HHX**, **HTX**, or **IB** diploma.

- **STX (Almen studentereksamen)** – Broad focus on humanities, science, and social sciences. Good if you want to keep your options open.
- **HHX (Højere handelseksamen)** – Focus on business, economics, and international trade. Great if you're interested in business or entrepreneurship.
- **HTX (Højere teknisk eksamen)** – Focus on technology, science, and math. Good if you're into engineering, IT, or science.
- **IB (International Baccalaureate)** – An international program in English. Good if you're interested in studying abroad later or want to learn in English.

 Recommended if:

You want to go to university later or keep a wide range of career paths open.

2. EUD (Erhvervsuddannelse / Vocational Education)

This is more hands-on and prepares you for a specific profession. You combine school with apprenticeship in a company.

Examples:

- Electrician
- Carpenter
- Hairdresser
- Chef
- Healthcare assistant

There are also combined programs like **EUX**, which mix vocational training with academic subjects, letting you keep the option of university later.

💡 Recommended if:

You want to start working sooner, enjoy practical work, or want a more hands-on learning experience.

🎓 3. 10th Grade (10. klasse)

Optional. If you're unsure what to do next or want to improve grades before applying to gymnasium or vocational education.

💡 Recommended if:

You want an extra year to mature, explore interests, or improve grades.

🕒 How to choose?

Ask yourself:

- Do you like studying theory and abstract ideas? → Try **STX**, **HTX**, or **IB**.
 - Are you interested in business or economics? → Consider **HHX**.
 - Do you like working with your hands, tools, or people directly? → Try **EUD** or **EUX**.
 - Still unsure? → Maybe take **10th grade** at an **efterskole** or regular school to explore your interests more.
-

🌍 As someone with Haitian roots:

You might also consider using your language or cultural background as a strength. Careers in international relations, translation, social work, or global business could be interesting paths if that resonates with you.

If you'd like, I can help you explore specific schools or programs near where you live in Denmark. Just let me know your interests and where you're located!
