

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Honduras. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing a bit about yourself — it's great that you're thinking ahead about your future. Since you're in Denmark, you've just completed **Folkeskolen**, and you're now choosing between different upper secondary education paths. Here's a breakdown of your main options and some guidance based on your background and interests:

🎓 Your Educational Path Options After Primary School in Denmark

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are for students aiming to go to university afterwards.

- **STX (Almen studentereksamen)** – Focuses on a mix of humanities, science, and social science.
- **HHX (Højere handelseksamen)** – Focuses on business, economics, and languages.
- **HTX (Højere teknisk eksamen)** – Focuses on technology and natural sciences.
- **HF (Højere forberedelseseksamen)** – Shorter (2 years), more practical, good for adults or those who want a flexible route to further education.

Good if you:

- Want to go to university.
- Enjoy academic subjects.
- Are curious about the world and ideas.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These combine school and apprenticeship (praktik) in a real job. Examples: electrician, carpenter, social worker assistant, hairdresser, IT supporter, etc.

Good if you:

- Want to learn by doing.
- Want to work sooner.
- Are more practical or hands-on.

3. Kombineret forløb (EUX)

A combination of both: vocational training **and** general upper secondary courses. You can both work in a profession **and** go to university later.

Good if you:

- Want both a skilled job and the option to study later.
 - Aren't sure yet what you want.
 - Like a mix of practical and academic learning.
-

How to Choose the Right Path for You

Ask yourself:

- **What do I enjoy learning about?**
 - **Do I want to work right away after school, or study at university?**
 - **Do I learn better by reading and writing, or by doing and building?**
 - **Do I want a clear career path, or more options?**
-

Personal Recommendation (Based on What You Shared)

You're fluent in Danish and grew up in a multicultural background — that's a strength. If you like school, reading, thinking about ideas, or want to keep your options open, I'd suggest:

- ♦ **STX or HHX** if you're academic, curious, and think you might want to study at university later.
 - ♦ **EUX** if you're practical but want to keep doors open for further education.
 - ♦ **EUD** if you already know you want to work in a specific trade or job.
-

Extra Tip

You can also talk to a **UU-vejleder (Ungdommens Uddannelsesvejledning)** in your kommune. They can help you with more personal advice and help arrange visits to schools.

Would you like to explore what careers match your interests or know more about the specific programs (like STX vs HHX)?
