

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Iceland. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish.

What educational path would you recommend for me?

Thanks for sharing your background—that helps a lot. Since you've just finished primary school in Denmark and are fluent in Danish, you're now standing at a pretty important crossroads. Here's a breakdown of your options and some tailored advice to help you decide on the best path:

🎓 Your Main Educational Options After Primary School (Folkeskole) in Denmark:

1. Gymnasium (STX) – General Upper Secondary School

- **Good for:** University-bound students who want broad academic education.
- **Subjects:** Focuses on humanities, sciences, and social sciences.
- **Why choose it?** Ideal if you enjoy school subjects and want to keep many doors open, including university in Denmark, Iceland, or elsewhere.

2. HHX – Higher Commercial Examination Programme

- **Good for:** Students interested in business, economics, marketing.
- **Why choose it?** Prepares you well for a career in business or for studying business/economics later at university.

3. HTX – Higher Technical Examination Programme

- **Good for:** Students interested in science, technology, IT, and engineering.
- **Why choose it?** If you're into tech, innovation, or engineering careers.

4. EUX – Vocational + Academic Education

- **Good for:** Students who want a job-oriented path *and* the option to go to university.
- **Why choose it?** You get both a vocational education and a studentereksamen (upper secondary diploma). Great mix of hands-on and academic.

5. EUD – Vocational Education and Training

- **Good for:** Students who want to work soon and learn a trade (carpenter, chef, electrician, etc.).
- **Why choose it?** Very practical, shorter time in school, quicker path to work.

Special Note – Icelandic Connection

Since your parents are from Iceland, you technically have the option to study there too. The Icelandic system recognizes Danish upper secondary education, and vice versa. If you ever consider university in Iceland, make sure to choose an upper secondary path that qualifies you (usually STX, HHX, or HTX).

How to Choose the Right Path

Ask yourself:

1. **Do you want to go to university later?** → Choose **STX**, **HHX**, **HTX**, or **EUX**.
 2. **Do you like working with your hands or want to get a job quickly?** → Consider **EUD**.
 3. **Are you interested in tech, engineering, or science?** → Look into **HTX** or **EUX Tech**.
 4. **Do you enjoy languages, history, or social science?** → **STX** is probably the best fit.
 5. **Do you like business or want to be an entrepreneur?** → **HHX** is great.
-

You Can Change Your Mind Later

- If you start one path and realize it's not for you, you *can* switch within the first few months, or even after the first year in some cases.
 - There are also **10th grade options** (Efterskole, FGU, or municipal 10th grade) if you want a year to think more or grow personally/socially.
-

My Recommendation (Based on What You Shared)

Since you're fluent in Danish, just finished primary school, and didn't mention a strong pull toward a specific trade, I would recommend:

STX or HHX, depending on your interests:

- If you enjoy general subjects and want to keep lots of options open → **STX**
- If you're curious about business or economics → **HHX**

But if you're more hands-on and not so into traditional academic school, then **EUX** is a brilliant hybrid option.

Would you like help comparing schools near where you live or deciding between a couple specific interests?
