

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Indonesia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing that! Since you're 16, fluent in Danish, and just finished primary school (which in Denmark means you're likely done with **folkeskole**, around 9th or 10th grade), you're now at a key decision point for your future. Denmark offers several strong paths after folkeskole, depending on your interests, goals, and how you prefer to learn.

Here are your **main options**, with some recommendations depending on your personality and aspirations:

1. Gymnasium (STX, HTX, HHX) – Academic Upper Secondary Education

These are 3-year programs that prepare you for university. Great if you're interested in academic studies and want to keep your options open.

- **STX (Almen studentereksamen):** Focuses on humanities, social sciences, and natural sciences. Good general preparation.
- **HTX (Teknisk studentereksamen):** Focuses on technology and natural sciences. Good if you're into engineering, tech, or science.
- **HHX (Handel studentereksamen):** Focuses on business, economics, and language. Good if you're thinking about business, finance, or international careers.

 **Recommended if:** You enjoy school, like academic subjects, and are thinking of university later.

2. EUX or EUD – Vocational Education and Training

These are practical educations where you learn a trade (e.g., electrician, carpenter, hairdresser, chef), and often get paid during apprenticeships.

- **EUD:** Direct vocational education. Usually 2–4 years depending on the field.
- **EUX:** Combines vocational training with academic courses. You can go to university afterward too.

 **Recommended if:** You like hands-on learning, want a job quickly, or want to work in a specific trade. EUX is great if you want both practical skills *and* the option to study later.

3. International Opportunities / Study Abroad

Since you have Indonesian roots and already speak Danish, you might also explore international options. Denmark has international programs (in English), or you could explore exchange years or study abroad in the future.

💡 **Recommended if:** You're globally minded or want to connect more with your Indonesian heritage or learn new cultures.

❤️ Some Personalized Advice

Based on your background and the fact that you're fluent in Danish and probably bilingual, you might have some unique strengths:

- **If you're academic and want options later:** Consider **STX or HHX**, especially if you're interested in university later.
 - **If you're hands-on and want a career sooner:** Look into **EUX** – you can become highly skilled and still have the option to study later.
 - **If you're unsure:** Visit local open house events (*åbent hus*) at different schools. Talk to guidance counselors (*studievejleder*).
-

📌 Next Steps

1. **Talk to a guidance counselor (studievejleder)** at your school or municipality.
2. **Visit educational fairs** or school open houses near you.
3. **Think about what you enjoy most:** people, tech, business, creativity, etc.

If you want, I can help you create a short list of schools or programs near where you live. Just tell me your town or region in Denmark, and what you're interested in!
