

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Indonesia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing that—it's great that you're thinking seriously about your next step at 16. In Denmark, after finishing **folkeskole** (primary and lower secondary school), you have several educational paths available. The best path for you depends on your interests, strengths, and what kind of career or life you see for yourself. Here's a breakdown to help you choose:

1. Gymnasiale uddannelser (Upper Secondary Education)

These are academic paths that prepare you for university or other higher education. If you're interested in studying further after this, these are good choices.

STX (Almen studentereksamen) – General Upper Secondary School

- Focus: Broad mix of sciences, humanities, and languages.
- Good if: You're unsure what you want to study later or want to keep doors open.

HTX (Teknisk studentereksamen) – Technical Upper Secondary School

- Focus: Science, technology, IT, and innovation.
- Good if: You like tech, engineering, or science.

HHX (Handelsstudentereksamen) – Business-Oriented Upper Secondary School

- Focus: Economics, business, marketing, and languages.
- Good if: You're interested in business, finance, or international work.

HF (Højere Forberedelseseksamen) – Higher Preparatory Examination

- Focus: Shorter (2 years), more practical than STX, for those who want a quicker path to higher education or specific professions.
- Good if: You want flexibility or are a more practically minded learner.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

If you want to **learn a trade or start working sooner**, this is a great path.

- Examples: Carpenter, mechanic, chef, hairdresser, IT-supporter, social- and healthcare worker (SOSU).
- Often includes **apprenticeship** (praktik) in a real workplace.
- Can also lead to **further education** later (e.g., erhvervsakademi).

3. Kombinerede forløb / Alternative paths

EUX

- A combination of **vocational training and academic education**.
- You get both a studentereksamen (like STX) and a vocational qualification.
- Good if: You want to keep university as an option **and** get practical experience.

How to Choose?

Ask yourself:

1. **Do I want to go to university someday?**
→ Consider STX, HTX, HHX, or HF.
2. **Am I more hands-on and want to start working earlier or learn a trade?**
→ Consider EUD or EUX.
3. **What subjects do I enjoy most?**
→ Let your interests guide your choice of school type and focus area.
4. **Do I want to stay in Denmark or also consider international opportunities later?**
→ STX or HHX can be especially useful for international studies or work.

My Suggestion Based on What You Shared:

Since you're fluent in Danish, born in Denmark, and have a multicultural background (with Indonesian roots), you have a **strong position** in both Danish and potentially international environments. If you're **not sure yet what you want to become**, I would recommend:

STX or EUX, depending on how academic vs. practical you are.

- **STX** gives you a lot of flexibility for future university options.
- **EUX** gives you both practical skills and a strong academic base.

If you'd like, I can help you explore schools near you, or go deeper based on your interests (like science, tech, art, business, healthcare, etc.). Would that help?
