

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Iraq. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that. You're at a really important point in your life, and it's great that you're already thinking ahead. Since you just finished primary school in Denmark (which typically ends at 9th or 10th grade), you have several solid options depending on your interests, goals, and how you like to learn.

Here's a breakdown of your main **educational paths** after primary school in Denmark:

🎓 1. Gymnasium (General Upper Secondary Education – STX, HHX, HTX, HF)

This is the most common next step if you're aiming to go to university later.

- **STX** – *Almen studentereksamen*: Focuses on academic subjects like Danish, history, science, math, languages, and social studies. Good if you're unsure and want to keep doors open.
- **HHX** – *Højere handelseksamen*: Focus on business, economics, and international trade. Great if you like business or plan to work in a company or start one.
- **HTX** – *Højere teknisk eksamen*: Focus on science, technology, and engineering. Ideal if you're into computers, mechanics, biology, etc.
- **HF** – *Højere forberedelseksamen*: A 2-year program, more practical than STX. Often used by older students or those who want a shorter path to further education.

✓ *Choose one of these if you like academic learning and think you might want to go to university later.*

🔧 2. EUD / EUX (Vocational Education and Training)

This is a hands-on education where you train for a specific job (like electrician, hairdresser, mechanic, social worker, etc.).

- **EUD**: Focused on practical skills; you often split time between school and working in a company.
- **EUX**: Combines vocational training with subjects like Danish, English, and math – so you also get access to university later.

✓ *Choose this if you prefer learning by doing and want to start working sooner – but still want the option to study more later with EUX.*

🧩 3. 10th Grade (10. klasse)

Optional year that helps students figure out what they want. Useful if you need time to mature, improve your grades, or decide your path.

✓ *Choose this if you're unsure or feel you need more time to grow personally or academically.*

How to Choose – Questions to Ask Yourself:

- Do I like studying theory (reading, writing, tests), or do I prefer doing practical things with my hands?
- Do I want to go to university one day?
- What subjects or activities make me feel excited or motivated?
- Do I want to start earning money earlier, or study longer first?
- Are there any role models (in your family or community) whose careers interest you?

Possible Examples Based on Common Interests

Interest	Recommended Path
Science / Engineering	HTX or STX
Business / Economy	HHX or EUX Business
Technology / IT	HTX or EUD IT-supporter
Working hands-on	EUD or EUX
Health / Social Work	STX, HF, or EUD Social & Health (SOSU)
Creative fields (art, design)	STX (with arts focus) or special design schools later

Tip:

If you're unsure, **visit some schools during open house events ("åbent hus")**, or do a **praktik** (internship week) to get a real sense of different environments.

If you tell me a bit more about your interests (subjects you liked in school, dream jobs, or hobbies), I can give you a more tailored recommendation.
