

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Israel. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and important question, and it's fantastic that you're already thinking seriously about your future.

In Denmark, after completing **folkeskole** (primary and lower secondary education), you typically have a few different educational paths to choose from, depending on your interests, strengths, and future goals. Here's a breakdown of the main options available to you, along with recommendations based on different interests:

Main Educational Paths After Folkeskole

1. Gymnasiale uddannelser (Upper Secondary General Education)

This is a common path if you're considering university later.

Most common types:

- **STX (Studentereksamen)** – broad general education, includes humanities, science, and social science.
- **HHX (Higher Commercial Examination Programme)** – focused on business, economics, and marketing.
- **HTX (Higher Technical Examination Programme)** – focused on science, technology, and IT.
- **HF (Higher Preparatory Examination Programme)** – a 2-year version, more practical, for students who want a shorter route or a change from traditional school life.

Recommended if:

- You enjoy academic subjects.
- You're considering going to university or higher education in the future.
- You're not sure yet what you want to do, and want to keep your options open.

2. Erhvervsuddannelser (Vocational Education and Training – EUD/EGU)

A practical path that combines school and apprenticeship.

You can become a:

- Electrician, carpenter, chef, mechanic, health care assistant, etc.

- Many programs let you get a **EUX**, which combines vocational training with the ability to go to university later.

✓ Recommended if:

- You prefer hands-on work.
- You already know a trade or profession you're passionate about.
- You want to earn money while learning.

How to Decide?

Ask yourself:

- Do I enjoy academic learning, or do I prefer practical, hands-on tasks?
- Do I want to go to university later?
- Am I interested in specific subjects (e.g., business, technology, biology)?
- Do I want to start earning money soon?
- Do I thrive in a structured school environment, or would I rather learn through doing?

Additional Considerations for You

- **Fluent in Danish:** Great – it gives you full access to all Danish educational options.
- **Israeli background:** You could consider international opportunities in the future – a gymnasium might prepare you better for studying abroad if that interests you.
- **Young Age (16):** You're still early in your journey. It's okay not to know exactly what you want. Choosing a flexible path like **STX** or **EUX** can be a smart way to keep doors open.

✨ My Personalized Recommendation

Since you've just finished primary school and are fluent in Danish, I recommend:

👉 **STX or EUX – depending on whether you like academic or practical learning.**

- If you like studying and might want to go to university one day: **STX**.
- If you prefer learning by doing and are interested in a trade *but* still want the option of higher education: **EUX**.

If you'd like, I can also help you explore specific schools or programs near where you live, or even suggest a path based on your interests (e.g. science, arts, business). Would you like that?
