

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Israel. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background—you're in a great position to explore different educational paths in Denmark. Since you've finished primary school (folkeskolen), you now have a few common options ahead of you depending on your interests, strengths, and goals. Here's a breakdown of what might suit you based on different directions:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

These programs are typically 3 years and prepare you for university. Choose this if you're interested in academic subjects and possibly going to university later.

- **STX (Almen studentereksamen)** – General upper secondary school with a broad mix of humanities, science, and social sciences. Good if you're still unsure what field you want.
- **HHX (Højere handelseksamen)** – Focus on business, economics, and international studies. Great if you like business, marketing, or entrepreneurship.
- **HTX (Højere teknisk eksamen)** – Focus on science, tech, and engineering. Ideal if you enjoy math, physics, or IT.
- **HF (Højere forberedelseeksamen)** – A 2-year option for those who want a faster path to higher education or didn't feel ready for a full 3-year program.

Recommended if: You enjoy school, want more theoretical learning, and may want to go to university later.

🔧 2. Erhvervsuddannelser (Vocational Education and Training, EUD)

This path mixes school and apprenticeship. You'll learn a trade and usually work part-time as a trainee. Programs last 2–5 years depending on the trade.

- Examples: Electrician, carpenter, chef, hairdresser, mechanic, health care worker, etc.
- You can also later combine EUD with **EUX**, which gives both a vocational qualification and access to higher education.

Recommended if: You prefer hands-on learning, want to earn money during your education, and maybe don't enjoy academic subjects as much.

💡 3. Special Programs

Depending on your interests, there are also some specialized schools:

- **International programs** (especially with your Israeli background—you could consider IB programs if you want a more international education).
- **Efterskole** (for 9th or 10th grade again, with focus on personal development, creativity, or specific interests like sports or arts).
- **Folk High School (Højskole)** – Non-traditional, more for personal growth than formal education, typically for students a bit older.

Choosing Based on Your Goals:

Here are a few questions to help guide your choice:

1. **Do you want to go to university later?**
 - Yes → STX, HHX, HTX, HF, or EUX.
2. **Do you want to start working soon or prefer learning by doing?**
 - Yes → Vocational education (EUD/EUX).
3. **Are you interested in business or technology?**
 - Business → HHX or EUX Business.
 - Technology → HTX or EUX Tech.
4. **Do you want an international option?**
 - Consider an **International Baccalaureate (IB)** program.

Personal Advice:

Being fluent in Danish and having an international background is a big advantage—many employers and universities value multicultural experience. If you're unsure what to do, you could:

- Visit an **UU-vejleder (educational advisor)** through *Ungdommens Uddannelsesvejledning* in your kommune. They can give you personalized help.
- Attend **open house events** (åbent hus) at different schools to see what they offer.
- Talk to students currently in the programs you're curious about.
