

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Israel. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question—and you're at a very important point in your life. Since you're in Denmark and just finished **primary school** (which usually means you've completed 9th or 10th grade), your next step typically falls into one of two main educational tracks: **general upper secondary education** or **vocational education and training (EUD)**. The best choice depends on your interests, goals, and learning style.

Here's a breakdown of your options and what might be a good fit for you:

✓ 1. General Upper Secondary Education

This path is ideal if you're interested in **going to university later**.

Main Options:

- **STX (Studentereksamen)** – Focuses on academic subjects like languages, science, social studies.
- **HHX (Higher Commercial Examination)** – Focus on business, economics, marketing.
- **HTX (Higher Technical Examination)** – Focus on technology, IT, science, and engineering.
- **HF (Higher Preparatory Examination)** – Shorter, 2-year program, good if you're more mature or took a break.

Recommended if you:

- Enjoy academic learning and exams.
- Want to study at university in the future.
- Are still figuring out your career path and want to keep doors open.

✓ 2. Vocational Education and Training (EUD/EUX)

This is the path if you're interested in a more **hands-on or practical profession**.

- **EUD** – Learn a trade (like electrician, chef, hairdresser, mechanic, etc.).
- **EUX** – Combines vocational training with academic subjects, allowing you to go to university later if you choose.

Recommended if you:

- Prefer practical work over classroom learning.
- Want to start earning earlier.

- Have a clear idea of a trade or profession you'd like to pursue.
- Like the idea of combining learning and working (apprenticeships).

Considering Your Background

- You're fluent in Danish and were born in Denmark, so you're well integrated.
- If your parents are from Israel and you've grown up with two cultures, this is a strength. Maybe you're also fluent in Hebrew? That could open doors in **international relations**, **language studies**, or **business**.

How to Choose?

Here are a few questions to ask yourself:

- Do I enjoy theoretical learning or practical tasks more?
- Do I already have a dream job in mind (e.g., engineer, doctor, chef, graphic designer)?
- Would I like to travel or study abroad later?
- Do I want to start working sooner or study longer?

Suggested Path Based on Common Interests

Interest Area	Suggested Path	Why?
Science/Tech/Engineering	HTX or EUX Technical	Strong technical base, opens many doors.
Business/Finance/Marketing	HHX or EUX Business	Good if you're entrepreneurial or like numbers.
Social Studies/Languages	STX or HF	Best for future university in humanities or social science.
Hands-on work (e.g. mechanic, chef)	EUD	Direct path to skilled jobs and apprenticeships.

Would you like to tell me a bit about your **interests** or **career ideas**? I can give you a more personalized recommendation if I know what kinds of things you enjoy doing or want to do in the future.
