

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Jordan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question—and a very important decision to make. Since you're 16 and just finished primary school in Denmark, you're at the stage where you can choose among several **youth education** pathways, depending on your interests, strengths, and future plans. Here's a breakdown of your options and some tailored advice:

Main Educational Paths in Denmark After Primary School

These are the three main types of youth education (ungdomsuddannelser):

1. Gymnasiale uddannelser (General Upper Secondary Education)

Duration: 3 years

Goal: Prepares you for university or higher education

Types:

- **STX (Studentereksamen)** – Broad academic focus (humanities, science, social sciences)
- **HHX (Handelsskolens eksamen)** – Business and economics focus
- **HTX (Teknisk eksamen)** – Focus on science and technology
- **HF (Højere forberedelseseksamen)** – 2-year program for more practical or mature students

 Recommended if:

- You want to go to university
- You enjoy academic subjects
- You're not sure what you want yet, but want to keep your options open

2. Erhvervsuddannelser (Vocational Education & Training, EUD)

Duration: 2–5 years

Goal: Prepare you for a specific job (crafts, healthcare, IT, business, etc.)

Includes apprenticeships and real-world job training

 Recommended if:

- You like practical work (hands-on)
- You want to start working sooner
- You have a specific trade or job in mind

3. Kombinerede forløb (EUX)

Combines vocational training (EUD) **with** academic courses from upper secondary

Duration: 4–5 years

✓ Recommended if:

- You want a job quickly but also want the option to go to university later
- You're hardworking and like both school and hands-on learning

Personal Factors to Think About

Here are some questions to help you decide:

Question	Why it matters
Do you enjoy school and academic subjects like math, languages, science?	If yes → consider STX, HHX, HTX
Do you prefer working with your hands, tools, or people?	If yes → EUD might suit you well
Do you want to go to university someday?	Choose a gymnasium path or EUX
Do you want to start working and earning money soon?	EUD or EUX might be faster routes

My Advice (based on what you've shared)

Since you:

- Are fluent in Danish
- Have a multicultural background (Jordanian roots can be a strength!)
- Just finished primary school
- Are not sure what to do next

I would recommend one of the following paths, depending on your interests:

Option 1: STX

- Gives you a broad education and keeps your options open
- Ideal if you're unsure what to study later
- Good mix of humanities, science, and social sciences
- Great foundation for university

Option 2: EUX

- If you like doing things practically but still want the option to go to university
- For example: EUX in IT, Business, Health Care, or Building & Construction
- You'll get paid during apprenticeships, which is nice

Option 3: HHX

- If you're interested in business, marketing, or economics
 - Also opens doors to university or business schools
-

Tips

- Visit **uddannelsesguiden.dk (UG.dk)** – it has tools and quizzes to help you choose
 - Talk to a **UU-vejleder (Youth Guidance Counselor)** at your school or local kommune
 - Attend **open houses** at local gymnasiums or vocational schools
 - Ask older students about their experiences
-

If you tell me more about what subjects you like or what jobs sound interesting to you, I can give a more specific recommendation 😊
