

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Kazakhstan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's a big milestone—congratulations on finishing primary school! Since you're 16 and living in Denmark, you're likely deciding between different youth education options now. In Denmark, the education system after primary/lower secondary school (Folkeskole) typically offers a few main paths. The best one for you depends on your interests, strengths, and career goals.

Here are your main options, with advice based on different situations:

1. Gymnasium (STX, HHX, HTX) – If you enjoy academic subjects and want to keep many doors open

These are 3-year general upper secondary programs that prepare you for university.

- **STX (Alment gymnasium):** Focuses on humanities, natural sciences, and social sciences. Good for broad academic interests.
- **HHX (Higher Commercial Examination Programme):** Focuses on business, economics, and languages. Great if you're into business or want to start a company.
- **HTX (Higher Technical Examination Programme):** Focuses on technology and science. Best for those interested in engineering, IT, or science.

→ Good choice if you enjoy studying, want to go to university, or aren't sure what to do yet but want options.

2. EUD (Vocational Education and Training) – If you prefer practical work and want to start a career earlier

This path combines school and apprenticeship (praktik) and can lead directly to a job.

- Examples: Electrician, carpenter, chef, hairdresser, healthcare assistant, etc.
- You can also take EUX, which combines vocational training with subjects that qualify you for university later.

→ Good choice if you like hands-on work, want to earn money sooner, or are interested in a trade.

3. EUX – Best of both worlds

This combines vocational training with a general upper secondary education. It's longer and more demanding, but it gives you both a trade and a university-qualifying exam.

→ Great if you want both job skills and the option to study at university later.

Recommendations Based on Your Situation

Since you're fluent in Danish, grew up in Denmark, and have just finished Folkeskole, you're on equal footing with your classmates in terms of opportunities. Here's how to choose:

Choose Gymnasium if:

- You're academically inclined and enjoy subjects like languages, math, science, or social studies.
- You're considering university.
- You want more time to decide your career path.

Choose EUD or EUX if:

- You enjoy practical, hands-on tasks.
 - You want to enter the workforce faster or learn a specific skill.
 - You want to earn while you learn (EUD) or keep doors open for university (EUX).
-

Final Tips

- **Talk to a guidance counselor (Studievejleder)** – they can help match your interests and strengths with the right path.
 - **Visit schools** – Most offer open house events where you can see what it's like.
 - **Try a Brobygning (bridge-building course)** – where you visit a school for a few days to try it out.
