

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Kenya. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question—and it's really good that you're already thinking ahead about your future. In Denmark, after finishing primary school (folkeskolen), you have several solid educational paths to choose from, depending on your interests, goals, and how you prefer to learn.

Here's a breakdown of your main options after 9th or 10th grade:

1. Gymnasium (STX) – General Upper Secondary School

- **Focus:** Academic subjects like science, languages, history, social studies.
- **Duration:** 3 years.
- **Good for you if:**
 - You enjoy theoretical learning.
 - You want to keep your options open for university.
- **Leads to:** University (e.g., University of Copenhagen, Aarhus University), or other higher education.

2. HHX – Higher Commercial Examination Programme

- **Focus:** Business, economics, marketing, and international trade.
- **Duration:** 3 years.
- **Good for you if:**
 - You're interested in business or entrepreneurship.
 - You might want to study business or economics later.
- **Leads to:** Business-related university studies or jobs in trade and business.

3. HTX – Higher Technical Examination Programme

- **Focus:** Science, technology, IT, and engineering.
- **Duration:** 3 years.
- **Good for you if:**
 - You're into technology, engineering, or design.
 - You're curious about how things work.
- **Leads to:** Engineering programs, IT, or technical universities.

4. EUD – Vocational Education and Training

- **Focus:** Hands-on job training (e.g., electrician, chef, carpenter, social care).
 - **Duration:** 1.5 to 5 years depending on the trade.
 - **Good for you if:**
 - You want to work sooner and like practical work.
 - You have a clear idea of a skilled trade or profession you want.
 - **Leads to:** A job, or later higher education (like erhvervsakademi or AMU).
-

5. EUX – Combination of Vocational + Academic

- **Focus:** Combines EUD with academic classes.
 - **Duration:** 4–5 years.
 - **Good for you if:**
 - You want both a job qualification **and** the option to study at university.
 - **Leads to:** Both the workforce and higher education.
-

How to Decide?

Ask yourself:

- **What are you passionate about?**
 - Science, business, art, helping others, technology?
 - **Do you enjoy theory or practical work?**
 - **Do you want to study more, or start working sooner?**
-

Example Pathways:

- If you want to be a **doctor, lawyer, or scientist** → STX.
 - If you dream of running a **business** → HHX or EUX with business focus.
 - If you like **technology or design** → HTX or EUD in tech.
 - If you're hands-on and want to work soon → EUD or EUX.
 - If you're not sure yet → STX is the most flexible.
-
