

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Kiribati. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that – it's great that you're already thinking ahead about your future. Since you've just finished primary school in Denmark and you're 16, you're at a typical age to choose your upper secondary education path. The Danish education system offers a few solid options depending on your interests, strengths, and career goals. Here's a breakdown of your main choices:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academic programs that prepare you for university or other higher education.

Options:

- **STX (Studentereksamen):** Broad general education. Good if you like subjects like history, languages, sciences.
- **HHX (Higher Commercial Examination):** Focuses on business, economics, and marketing. Great if you're interested in business or international trade.
- **HTX (Higher Technical Examination):** Focus on science, technology, and IT. A strong choice if you enjoy technical subjects or want to become an engineer, programmer, etc.
- **HF (Higher Preparatory Examination):** Shorter 2-year program, often chosen by older students or those who want to get to university quickly. More practical in focus.

 **Best for you if:** You enjoy academic subjects and might want to go to university later on.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

This combines school with apprenticeship (praktik) in a workplace. It prepares you for specific trades (like carpentry, hairdressing, health care, mechanics, etc.)

- You start with **Grundforløb** (basic course), then move on to the **Hovedforløb** (main part), including your internship.

 **Best for you if:** You prefer hands-on learning and want to start working sooner or in a specific trade.

Other Options:

- Kombineret Ungdomsuddannelse (KUU):

A flexible program if you're unsure or need a little extra time to find the right path. Prepares you for either work or further education.

- 10. klasse:

If you feel you're not quite ready for upper secondary yet, you can take a 10th school year. Many use it to explore options, mature a bit, or improve grades.

What to Think About When Choosing:

- Do you enjoy academic subjects or prefer practical work?
 - Do you want to go to university later?
 - Do you already have a career dream? (Doctor, engineer, designer, mechanic?)
 - How do you like to learn – reading & writing or hands-on?
-

Personal Suggestion (based on what you shared):

Since you're fluent in Danish, were born and raised in Denmark, and have a multicultural background, you might thrive in paths like:

- **STX** – if you're still exploring your interests and might want to go to university later.
- **HHX** – if you're interested in international business, economics, or using your bilingual background.
- **HTX** – if you're into technology or science.

If you're more into **working with your hands**, or want a faster path to employment, then an **EUD** track could be very rewarding.

Would you like me to help you match your interests or strengths to specific programs or careers? I can help you explore what fits you best based on your personality or hobbies.
