

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Kiribati. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you've just finished primary school in Denmark at 16 (which suggests you may have followed a different path or started later), you're at an important crossroads. Your next step depends on your interests, strengths, and long-term goals — but here's a general breakdown of your options in the Danish education system after primary school:

🎓 Main Education Paths After Primary School in Denmark

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are 3-year academic programs that prepare you for university. Good if you're interested in academic studies.

- **STX (Studentereksamen):** Focus on general subjects like science, humanities, and languages.
- **HHX (Higher Commercial Examination):** Focus on business, economics, and marketing.
- **HTX (Higher Technical Examination):** Focus on science, technology, and design.
- **HF (Higher Preparatory Examination):** 2-year option, more flexible, often for older students or those unsure about long-term academic goals.

✅ Choose this if:

You enjoy studying theoretical subjects, want to go to university later, or are still exploring your interests.

2. Erhvervsuddannelser (Vocational Education and Training – EUD/EGU)

These combine school with paid internships (praktik) and prepare you for skilled jobs.

- Examples: Electrician, carpenter, hairdresser, healthcare worker, IT technician, chef, etc.
- Usually 3-4 years depending on the trade.

✅ Choose this if:

You like learning by doing, want to work sooner, or are interested in a practical career path.

3. Kombinerede forløb (EUX)

This is a hybrid between vocational training and academic education. You get both a vocational qualification *and* a general upper secondary certificate.

✅ Choose this if:

You want the flexibility to both work in a trade and possibly go to university later.

How to Decide What's Best for You

Ask yourself these questions:

- Do I enjoy academic subjects like languages, math, science?
- Do I prefer hands-on learning and getting into the workforce earlier?
- Am I interested in starting my own business one day?
- Would I like to study at university or college?
- Do I already know what career I want?

Extra Tip (Personalized for You)

Since your parents are from **Kiribati**, and you're growing up in **Denmark**, you bring a unique cultural perspective. If you're interested in international work (e.g. climate, development, diplomacy), you could consider paths like:

- **STX with a global studies/language focus**
- **HHX if you're interested in international business**
- **Vocational training** with a later upgrade to higher education (via EUX or supplementary courses)

My Recommendation (Based on What You've Shared)

Since you're fluent in Danish and just finishing primary school now at 16, I'd recommend one of these:

1. **HF (2-year)** if you're a bit older and want a shorter, more flexible path to try out different academic areas.
2. **EUX** if you're interested in working with your hands and want to keep the door open to university.
3. **STX or HHX** if you want a full academic education and possibly want to go to university later.

If you'd like, I can help you narrow it down based on what you enjoy or what you dream of doing in the future. Just tell me a bit more about your interests.
