

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Kyrgyzstan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's great that you're thinking carefully about your next step—it's a really important decision, and the Danish education system gives you several solid options depending on your interests, strengths, and future goals.

Since you've just finished **primary/lower secondary school (folkeskole)** and are 16, your next typical step would be **youth education (ungdomsuddannelse)**. Here's a breakdown of your main options and some guidance to help you choose:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academic paths that prepare you for higher education (university or university colleges).

- **STX (Almen Studentereksamen)** – General and broad, good if you like subjects like Danish, history, languages, science, or social studies.
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and marketing. Good if you're interested in working in companies, finance, or starting a business.
- **HTX (Højere Teknisk Eksamen)** – Focus on science, technology, IT, and engineering. Great if you're into computers, mechanics, biology, or similar.
- **HF (Højere Forberedelseksamen)** – A 2-year program, more direct and practical, often for students who want a quicker route to specific higher education programs.

Choose this if:

You enjoy school subjects, want to keep your options open, and are considering going to university later.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These prepare you to work in a skilled trade or profession (often combining school and apprenticeship in a company).

Examples:

- Electrician
- Carpenter
- Chef
- Hairdresser
- IT-supporter
- Healthcare assistant

You start with a **basic course (grundforløb)**, then move to **apprenticeship (hovedforløb)** with hands-on experience.

 Choose this if:

You like practical work, want to start earning money sooner, and enjoy learning by doing rather than sitting in a classroom all day.

 How to Choose?

Ask yourself:

- Do I enjoy academic subjects and learning theory?
 - Do I prefer practical work and hands-on experience?
 - Do I want to go to university later?
 - What kind of work environment do I see myself in?
-

 You Can Switch Later

One great thing about Denmark's system is flexibility. If you start in one path and realize it's not right for you, you can often switch to another without losing too much time.

 My Suggestion Based on Your Info:

Since you're fluent in Danish, have a multicultural background (which is a strength!), and just finished primary school, I'd suggest:

- If you're still exploring your interests and enjoy school: **STX** or **HHX** (especially if you're interested in languages, society, or business).
 - If you're already leaning toward a hands-on career: look into **EUD** paths that match your interests (you can even try "EUX" which combines vocational training with academic subjects, so you can go to university later if you want).
-

If you'd like, I can help you find open houses, career counseling options ("uddannelsesvejledning"), or student experiences in your local area in Denmark. Just let me know your kommune or region.

Would you like help figuring out which program matches your interests more closely?
