

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Latvia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great context—thank you! Since you've just finished primary school in Denmark (folkeskolen), you're likely looking at the options that open up around age 16, which is a key transition point in the Danish education system.

Here's a breakdown of your **main educational paths** and what they could lead to, followed by some suggestions depending on your interests and goals:

1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are typically 3-year academic programs that prepare you for university.

- **STX (Studentereksamen):** Broad and academic, includes humanities, science, and languages. Good if you're still exploring your interests or aiming for university.
- **HHX (Higher Commercial Examination):** Focus on business, economics, and languages. Great if you're interested in business or want to work in international companies.
- **HTX (Higher Technical Examination):** Focus on science, technology, and engineering. Ideal if you're into tech, design, or science.
- **HF (Higher Preparatory Examination):** A 2-year option, often for older students or those who prefer a shorter, more practical academic route. It's less common right after 9th/10th grade but still an option.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These combine school and paid apprenticeships, leading to jobs like electrician, mechanic, hairdresser, or chef.

- **EUX:** A mix of vocational training and a gymnasial-level education, allowing you to both work in a trade and continue to university later.
- **EUD:** Focused purely on the trade, very hands-on and shorter in duration.

Things to consider:

- **Do you want to go to university later?**
 - → **Choose a gymnasial path (STX, HHX, HTX, or HF).**
- **Do you prefer hands-on learning and want to work sooner?**
 - → **Consider EUD or EUX.**

- **Are you interested in specific fields like business, technology, or science?**
 - → Choose a gymnasium that matches your interest (e.g., HHX for business, HTX for tech).
- **Do you want flexibility and to keep your options open?**
 - → **STX or EUX** are very flexible.

Example Pathways:

Your Interest	Recommended Path	Possible Outcome
Business or marketing	HHX or EUX Business	Work in sales, marketing, or go to business school
Engineering or tech	HTX or EUX Tech	Engineer, IT specialist, technician
University studies (humanities or sciences)	STX	University degree in law, psychology, biology, etc.
Quick entry to job market	EUD	Skilled trade (e.g. electrician, chef, carpenter)
Unsure, but want options open	STX or EUX	You keep both job and university options open

Final Thoughts:

Since you're fluent in Danish, born and raised in Denmark, and finishing primary school, you have access to the full range of options. If you're not sure yet what you want to do, that's totally normal at 16. STX or EUX might be the safest bets because they give you flexibility to change direction later.

If you'd like, I can help you:

- Match your interests or strengths with specific programs
- Find schools or programs near you in Denmark
- Look at job trends and future opportunities based on each path

Would you like to explore one of these options more deeply?
