

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Lesotho. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you've completed primary school and are already thinking about your future – that shows maturity and good planning!

In Denmark, after primary school (**folkeskole**), you have several educational paths to choose from, depending on your interests, strengths, and career goals. Here's a clear breakdown of your main options:

1. Gymnasiale Uddannelser (Upper Secondary Education – General Path)

These are academic programs that prepare you for university. If you're interested in subjects like science, languages, social studies, or humanities, this is a strong choice.

Types:

- **STX (Studentereksamen)** – Focus on general subjects like science, languages, and social studies.
- **HHX (Higher Commercial Examination)** – Focus on business, economics, marketing.
- **HTX (Higher Technical Examination)** – Focus on technology, science, IT.
- **HF (Higher Preparatory Examination)** – Shorter program (2 years); good if you prefer a less intense pace.

Choose this path if:

- You enjoy school subjects and might want to go to university later.
- You're interested in careers like medicine, law, teaching, engineering, etc.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

This is a practical, hands-on path. You combine school and internship/workplace training (called "læreplads").

Fields include:

- Carpentry, plumbing, and electrical work
- Health and social care
- Office work and retail
- Cooking and hospitality
- IT support and multimedia

● **Choose this path if:**

- You enjoy learning by doing and want to start working sooner.
- You're interested in trades or specific jobs that don't require university.

You can also take **EUX**, a combination of vocational training and upper secondary education, which gives you access to university later.

 3. 10. klasse (Optional)

This is an extra year after 9th grade, often used to get better academically or to decide what to do next. Many students take it at **efterskole**, which can also give you independence and social experiences.

● **Choose this if:**

- You're unsure about your next step and want more time.
 - You want to improve your grades or explore interests before committing.
-

So, what should you choose?

Let me ask you a few questions that can help narrow things down:

1. Do you enjoy more theoretical or more practical subjects?
2. Do you like working with people, machines, computers, or something else?
3. Are you considering going to university in the future?
4. Do you want to start working as soon as possible, or study longer?

If you tell me a bit more about your interests, I can suggest a more specific path or even recommend schools near you that fit your goals.

Would you like that?
