

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Lesotho. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great point in life to reflect on your future. Since you've just finished primary school in Denmark, and you're fluent in Danish, you have quite a few educational paths to choose from. What's best for you depends on your interests, strengths, and goals—but I'll give you an overview of your main options, how they work in Denmark, and what kind of careers or further studies they can lead to.

## Your Main Options After Primary School (Folkeskole) in Denmark

At your stage (typically after 9th or 10th grade), there are **three main educational paths**:

### 1. Gymnasiale Uddannelser (General Upper Secondary Education)

These programs are great if you want to **go to university** later.

#### Types:

- **STX (Studentereksamen)** – Focus on humanities, social sciences, and natural sciences.
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and international trade.
- **HTX (Højere Teknisk Eksamen)** – Focus on technical and science-related subjects.
- **HF (Højere Forberedelseksamen)** – Shorter (2-year) version, more practical, often for adults or those who want a quicker route.

#### Good if:

- You like school-style learning.
- You might want to study at university.
- You're not sure yet and want to keep your options open.

### 2. Erhvervsuddannelser (EUD) – Vocational Education & Training

You combine school with hands-on work in a company (apprenticeship). These are great if you want to learn a **trade or profession** and start working earlier.

#### Areas include:

- Construction (carpenter, electrician, etc.)
- Health & care (social and health assistant)

- Business (retail, office)
- IT and more.

### Good if:

- You like practical, hands-on work.
- You want to earn money while learning.
- You want to start working earlier but still have the option to study more later.

## 3. Kombinerede forløb / Produktionsskole / 10th grade

If you're unsure or need more time, you can:

- Take a **10th grade** year to mature, explore interests, or improve grades.
- Go to an **efterskole** – a special type of boarding school focused on personal growth, social skills, or special interests (sports, music, design, etc.).

### Good if:

- You need more time to decide.
- You want to explore different subjects or improve academically.
- You want a unique social experience.

### My Advice Based on What You Told Me:

You're 16, fluent in Danish, and grew up in Denmark but have a multicultural background. Here's a suggestion depending on what kind of person you are:

#### If you like academic subjects or want to keep your options open:

→ Go for **STX** or **HHX** – especially HHX if you might want to do business, international trade, or economics.

#### If you're more practical and want to get into work faster:

→ Look into **EUD** in a field that interests you – especially if you like working with your hands or want a job after 2–4 years.

#### If you're unsure:

→ A year in **10th grade** or an **efterskole** can help you figure things out without losing time in the long run.

### Tips for You:

- **Talk to a guidance counselor** at your school or local UU-vejleder.
  - **Visit open house events** (åbent hus) at schools you're considering.
  - Ask yourself: *What do I enjoy doing? What subjects interest me? Do I want to go to university someday?*
- 

Would you like me to help you explore a few specific options based on your interests? You can tell me:

- What subjects or activities you enjoy
- If you see yourself at university or working after school
- If you're curious about a specific job or area (like tech, business, health, art, etc.)

That way I can help you pick a more personalized path.
