

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Libya. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that about yourself — you're at an exciting point in life where you get to shape your own path. Since you're 16 and have just finished **primary school (folkeskole)** in Denmark, your next step will typically be choosing between a few main educational routes. Here's a breakdown with some advice based on your background and potential interests.

Main Educational Paths After 9th/10th Grade in Denmark:

1. General Upper Secondary Education (Gymnasiale Uddannelser)

These are more academic and prepare you for university.

- **STX (Studentereksamen):** Broad academic focus — good if you're unsure or want many options later.
- **HHX (Handelsskolen):** Focus on business, economics, and marketing.
- **HTX (Teknisk Gymnasium):** Focus on science, technology, and innovation.
- **HF (Højere Forberedelseseksamen):** A 2-year program, often for those who want a shorter path to higher education (might be more flexible).

Recommended if:

- You enjoy academic subjects.
- You're considering university.
- You're good at studying and want to keep your options open.

2. Vocational Education and Training (EUD/Erhvervsuddannelser)

These combine school and apprenticeship. You learn a trade or profession.

- Examples: Electrician, mechanic, hairdresser, chef, health care assistant.
- You get paid during your apprenticeship.

Recommended if:

- You like working hands-on.
- You want to start working earlier.
- You want practical skills with real job prospects.

3. Combination Programs (EUX)

A mix of vocational training **and** general academic subjects.

- Lets you become a skilled worker **and** be eligible for university later.
- Longer, but gives flexibility.

Recommended if:

- You're practical but still want higher education as an option.

Personal Factors for You to Consider:

- You're fluent in Danish — big plus. Use that to your advantage in any field.
- Your **Libyan roots** could give you unique perspectives. If you're bilingual or connected to your culture, it might open doors in international studies, translation, global business, etc.
- Think about what **you enjoy**: Are you curious about science? Do you like helping people? Are you entrepreneurial?
- Talk to a **UU-vejleder** (educational counselor) — they can give personalized advice.

Self-Reflection Questions

To help narrow things down, ask yourself:

- Do I enjoy academic learning (reading, writing, math)?
- Do I want to go to university someday?
- Do I want to start working sooner?
- Do I like working with people, tech, or my hands?
- What do I want my lifestyle to look like in 5–10 years?

My Suggestion (Based on What You've Shared)

If you're open to school and want to keep your future options broad, **STX or HHX** might be great starting points.

But if you're more practical or already interested in a trade or career, consider **EUX** — it gives you the best of both worlds.

Let me know what your interests are (e.g., technology, business, healthcare, languages), and I can give you a more tailored recommendation.
