

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Libya. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that — you're at an important decision point, and it's great you're thinking carefully about your next step.

In Denmark, after finishing **primary school (folkeskole)**, there are several paths you can take depending on your interests, strengths, and career goals. Here's a breakdown of your main options, with recommendations based on different scenarios:

🎓 1. Gymnasiale Uddannelser (Upper Secondary Education)

These are the most common academic routes if you're considering university in the future.

A) STX (Almen Studentereksamen)

- **Best if:** You enjoy general subjects like Danish, history, sciences, and languages.
- Prepares you broadly for university.

B) HTX (Teknisk Studentereksamen)

- **Best if:** You're interested in technology, natural sciences, or engineering.
- More focus on innovation and science.

C) HHX (Handelsgymnasiet)

- **Best if:** You like economics, business, or marketing.
- Great if you're thinking about starting your own business or working in finance.

D) HF (Højere Forberedelseseksamen)

- **Best if:** You want a shorter (2-year) academic program or didn't get the best grades but still want to go to university.
- Often more mature students, smaller classes.

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

- **Best if:** You like practical, hands-on work and want to enter the job market faster (or do a mix of work and study).
- Examples: electrician, mechanic, chef, carpenter, health assistant.

- You can also combine it with **EUX**, which gives you both vocational training **and** the possibility to go to university.
-

What to consider:

Your interests

- Do you like theoretical schoolwork or more practical tasks?
- Are you interested in technology, health, business, or something creative?

Your goals

- Do you want to study at university?
- Or would you rather start earning money and get experience sooner?

Language and culture

- You're fluent in Danish — that's a strong asset. If you're also fluent in Arabic or English, that can be helpful for jobs or studies in international fields.
-

My Personalized Suggestion:

Since you're fluent in Danish and have a multicultural background, you could consider **HHX** if you're interested in:

- Business, entrepreneurship, or international trade (your background could give you unique advantages in this space).

Or choose **HTX** if you're into:

- Tech, science, or engineering (Denmark has a strong demand for skilled tech professionals).

If you're unsure, you might visit an **UU-vejleder (youth guidance counselor)** in your area. They can help match your personality, interests, and grades to the right path.

Would you like me to help you explore one specific direction (like tech, business, healthcare, etc.) based on what you enjoy most?
