

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Lithuania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a thoughtful question — and it's great that you're considering your options carefully! Let's break it down based on your situation:

Your background

- You're 16, so you've likely just completed **folkeskole (primary/lower secondary school)**.
- You're fluent in Danish and likely familiar with Danish culture and society.
- You have Lithuanian roots, which could be an advantage if you want to work internationally or in multicultural environments.

Your options in Denmark after folkeskole

In Denmark, after 9th or 10th grade, you generally choose between these main paths:

1 Gymnasiale uddannelser (academic upper secondary education)

These prepare you for university:

- **STX** – general upper secondary school (broad focus on science, humanities, social sciences).
- **HHX** – business upper secondary school (focus on business, economics, marketing).
- **HTX** – technical upper secondary school (focus on technology, natural sciences).
- **HF** – higher preparatory exam (shorter program, often for older students or those who want a quicker route to university).

 *Best if you enjoy academic subjects and think you might want to go to university later.*

2 Erhvervsuddannelser (vocational education and training - VET)

- You combine school with apprenticeships in a company.
- Leads to a skilled trade qualification (e.g., carpenter, electrician, chef, healthcare assistant).

 *Best if you like hands-on learning and want to start working sooner or in a specific trade.*

Kombinerede muligheder

- **EUX** – combines VET with gymnasial-level studies, so you can get a skilled trade and still qualify for higher education.

 *Great if you want both practical skills and the option for university.*

What to consider

What subjects or activities do you enjoy most?

Are you drawn to science, languages, business, technology, arts, or working with people?

Do you prefer academic learning or practical hands-on work?

Do you see yourself going to university?

If you're unsure, gymnasiale uddannelser or EUX can keep doors open.

Would you like to include your Lithuanian background?

E.g., studies with international focus (HHX, STX with language focus) or consider exchange programs.

My recommendation

Since you're still exploring:

✓ **STX** or **HHX** could be a great choice — both give you broad options for the future.

✓ **HTX** if you're interested in science and technology.

✓ **EUX** if you like the idea of combining practical work with academic learning.

If you want, I can help:

- Suggest specific schools in your area
 - Help you compare STX, HHX, HTX or VET programs
 - Discuss career options linked to each path
-

🌟 **Tip:** It can help to visit open house events (åbent hus), talk to school counselors (uddannelsesvejledere), and maybe try a short internship or introductory course (brobygning).

If you tell me more about your interests, I can give a more tailored recommendation!

What subjects do you like most? What's your dream job — or even just a job that sounds fun?
