

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Lithuania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background — you're in a great position, with strong language skills and a multicultural perspective. In Denmark, there are several educational paths available after primary school (folkeskolen), and the right one depends on your interests, strengths, and goals. Here's an overview of your main options and some guidance:

1. Gymnasiale Uddannelser (Upper Secondary Education)

These are general academic programs that prepare you for higher education:

► STX – Studentereksamen

- **Focus:** Broad academic subjects (Danish, math, science, languages, humanities).
- **Best for:** If you're interested in going to university later and want a well-rounded education.
- **Duration:** 3 years.

► HHX – Higher Commercial Examination

- **Focus:** Business, economics, marketing, and languages.
- **Best for:** If you're interested in business, finance, or international trade.
- **Duration:** 3 years.

► HTX – Higher Technical Examination

- **Focus:** Science, technology, IT, and innovation.
- **Best for:** If you're into technology, engineering, or science.
- **Duration:** 3 years.

► HF – Higher Preparatory Examination

- **Focus:** Shorter academic program, more practical.
- **Best for:** If you want a 2-year path to higher education or need a fresh start.
- **Duration:** 2 years.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

- Combines school and apprenticeship in a real workplace.
- You earn a salary during the apprenticeship part.
- Over 100 specializations: mechanic, carpenter, electrician, chef, health care assistant, etc.
- **Best for:** If you want hands-on learning and to start working sooner.

► **EUX: Vocational + Academic**

- Combines vocational training with upper secondary subjects.
- **Best of both worlds:** lets you work in a trade or continue to university later.

✨ **How to Choose?**

Here are some questions to ask yourself:

- **Do you enjoy academic subjects and want to go to university?** → Consider STX, HTX, or HHX.
- **Do you prefer practical, hands-on work and want to get a job sooner?** → Consider EUD or EUX.
- **Do you have a clear interest in business or technology?** → HHX (business), HTX (tech).
- **Want flexibility and aren't sure yet?** → STX or EUX are both flexible paths.

Tip: Think Long-Term, But Stay Open

You're only 16, so it's okay not to know exactly what you want. Many students switch paths or combine them later. The Danish system is flexible — you can always move into a different path later through supplementary courses (for example, HF or VUC).

✅ **My Recommendation (Based on Your Profile)**

Since you're fluent in Danish, finished primary school in Denmark, and have both local and international background:

- If you're academically strong and curious about many topics → **STX**.
- If you're interested in business, trade, or economics (maybe even working internationally) → **HHX**.
- If you enjoy building, fixing, or creating things with your hands → **EUD or EUX**.
- If you're unsure, **STX or EUX** gives you the most flexibility.

Next Steps:

1. **Visit an educational guidance counselor (ungdommens uddannelsesvejledning, UU-vejleder).**
2. **Visit open house events (Åbent Hus)** at local gymnasier or vocational schools.
3. **Talk to family, teachers, or others who took different paths.**

Would you like help choosing based on your personal interests or strengths (like subjects you enjoy or future jobs you imagine)? I'd be happy to help you narrow it down.
