

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Lithuania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you're 16, just finished primary school (which in Denmark typically means **Folkeskole**, ending with 9th or 10th grade), you're at an important decision point. The good news is that Denmark offers several flexible education paths after primary school. Here's a breakdown of your main options based on your background and goals:

Main Educational Paths After Primary School in Denmark

1. Gymnasium (STX, HHX, HTX) – General Upper Secondary Education

If you enjoy academic subjects and might want to go to university one day, this is a solid route.

- **STX (Almen studentereksamen)**: Focuses on humanities, natural sciences, and social studies.
- **HHX (Handelsskolens studentereksamen)**: Business, economics, and international trade focus.
- **HTX (Teknisk studentereksamen)**: Science, tech, and engineering-oriented subjects.

✅ *Best if:* You like school, want a broad education, and are possibly aiming for higher education later (university or professional bachelor's).

2. EUX – Vocational + Academic Hybrid

Combines a **vocational education** with upper secondary academic courses. You get both **hands-on skills** and a **studentereksamen** equivalent.

✅ *Best if:* You're interested in a trade (like electrician, carpenter, IT support, etc.) but also want the option to go to university later.

3. EUD – Vocational Education and Training

Focused on **getting you ready for a job** with practical skills. Includes apprenticeships and can lead to great careers in fields like:

- Mechanics
- Hairdressing
- Carpentry
- Healthcare
- Culinary arts

✓ *Best if:* You prefer practical learning over academic studies and want to get into the workforce relatively quickly.

4. 10th Grade (Tiende Klasse)

If you're unsure what to do next, you can take a year to grow academically and socially in 10th grade.

- Regular 10th grade (at your local school)
- **Efterskole:** A boarding-style 10th grade with a focus on community and personal development (often includes music, sports, arts, or international studies)

✓ *Best if:* You're unsure of your path and want more time to mature and figure out your direction.

Key Questions to Ask Yourself

- Do I enjoy academic subjects, or prefer hands-on, practical work?
- Am I thinking of going to university later?
- Would I like to work soon, or spend more years in school?
- Are there particular industries or jobs I'm already interested in (tech, health, trades, business, etc.)?

Special Note: Lithuanian Background

Being fluent in Danish and having roots in Lithuania is a **huge advantage** — it gives you cultural awareness and possibly multilingual skills. If you want to explore **international careers** later (e.g., business, diplomacy, EU institutions), you might consider **HHX** or **STX** with language focus.

Recommendation Based on Your Situation

If you're still exploring and open to options:

- **Take 10th grade** at a **strong Efterskole** or regular 10th grade — it gives you more time to think.
- Then, based on your interests:
 - Choose **STX** or **HHX** if you're academically inclined.
 - Choose **EUX** if you want both practical skills and academic qualifications.
 - Choose **EUD** if you want to go straight into a skilled trade or craft.

If you'd like, I can help you explore concrete school options in your area in Denmark or specific programs you're curious about (like IT, business, or health). Let me know!
