

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Luxembourg. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that — and congrats on finishing primary school! That's a big step, and it's great you're already thinking ahead.

In Denmark, after **9th or 10th grade** (which wraps up "folkeskole"), students typically choose between a few main educational paths. Since you're 16 and just finishing primary school, you're likely at the stage to choose your **youth education** ("ungdomsuddannelse"). Here are your main options, along with some advice based on your situation:

🎓 1. General Upper Secondary Education – STX, HHX, HTX, or IB

These programs last **3 years** and prepare you for university.

A. STX (Almen studentereksamen)

- Broad focus: languages, social studies, natural sciences.
- Good if you're not yet sure what you want to study later.

B. HHX (Højere handelseksamen)

- Focus: business, economics, and international trade.
- Great if you're interested in commerce or entrepreneurship.

C. HTX (Højere teknisk eksamen)

- Focus: science, technology, and engineering.
- Good for future STEM (science/tech/engineering) careers.

D. IB (International Baccalaureate)

- International program taught in English.
- Great if you might study or work outside Denmark later (especially Luxembourg or elsewhere in Europe).
- Often found in bigger cities like Copenhagen or Aarhus.

Recommended if:

You enjoy academic subjects and want to go to university later.

🔧 2. Vocational Education and Training – EUD / EUX

A. EUD (Erhvervsuddannelse)

- Combine school and apprenticeship.
- Learn a trade (e.g., carpenter, chef, mechanic, hairdresser).
- Takes about 3–4 years.

B. EUX

- Mix of vocational training and general subjects.
- You get both a trade and the option to go to university later.

Recommended if:

You want to start working sooner, learn by doing, and maybe still want the option to study later.

Given Your Background

- You're fluent in Danish 
- Born and raised in Denmark 
- Parents are from Luxembourg  → You may have multilingual/cultural skills
- You're just now finishing primary school (around age 16), so you might have taken the **10th year**, which is totally normal

That gives you a lot of flexibility!

What to Think About When Choosing

Ask yourself:

- Do I enjoy theoretical learning or more hands-on work?
- Do I want to go to university later, or start working/training sooner?
- Do I want an international option (like IB) that keeps doors open abroad?
- What are my favorite school subjects right now?

My Honest Recommendation

If you're not 100% sure what you want, **STX** is a safe and flexible choice — it keeps the most doors open, especially if you like school and think you might want a degree later.

However, if you're more practically minded and want both a trade and the chance to go to university later, **EUX** is a fantastic choice too — it gives you a solid backup plan.

And if you're interested in international opportunities and are strong in English, the **IB** program could also be perfect — especially with your Luxembourgish background and potential EU mobility.

If you want, I can also help you compare specific schools or programs near where you live in Denmark. Just let me know your city or region.
