

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Luxembourg. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing your background — it's great that you're thinking ahead. Since you're 16, living in Denmark, fluent in Danish, and have just completed primary school, you're likely at the stage where you choose between **different youth education paths** (ungdomsuddannelser). In Denmark, there are three main types of educational routes after primary/lower secondary school (folkeskolen). Here's a breakdown of your options and some advice depending on your interests and future goals:

1. Gymnasiale uddannelser (General upper secondary education)

Good if you're academically inclined or considering university.

- **STX (Alment Gymnasium)** – Focuses on general subjects like languages, social studies, science, etc. A flexible choice if you're unsure about your future career.
- **HHX (Handelsskolens Gymnasium)** – Focuses on business, economics, and international trade. Great if you like commerce or international topics.
- **HTX (Teknisk Gymnasium)** – Focuses on science, technology, and design. Ideal for someone who likes innovation, engineering, or technology.
- **IB (International Baccalaureate)** – Taught in English, internationally recognized, and could be a great fit given your Luxembourgian background. Good if you're considering studying abroad later.

 **Best if** you want to go to university or keep many doors open.

2. Erhvervsuddannelser (Vocational education and training - EUD)

Good if you want to work sooner, learn by doing, or pursue a skilled trade.

- Combines school and apprenticeship. You get paid during your training.
- Careers: carpenter, electrician, chef, hairdresser, healthcare assistant, etc.
- Can also lead to further education (like **EUX**, which mixes vocational training with academic qualifications).

 **Best if** you want hands-on work, are motivated by practical learning, or already have a job type in mind.

3. EUX – The hybrid path

Combines vocational education with general upper secondary education.

- You become qualified for both a trade and higher education.
- More demanding, but very flexible long term.

📌 **Best if** you want a trade but also want to keep the option of university open.

💬 Some personal questions to consider:

- Do you enjoy academic work or hands-on activities more?
- Do you already have an idea of a future career?
- Are you open to studying abroad someday (e.g., in Luxembourg or elsewhere)?
- Do you want to work as soon as possible, or are you okay with a longer study path?

🇩🇰 Pathway examples based on goals:

Your Goal	Recommended Path
Go to university in Denmark	STX, HHX, HTX, or IB
Work in a trade or technical job quickly	EUD or EUX
Keep options open (job + university)	EUX or IB
Interested in international life/study	IB, HHX, or STX with languages

If you tell me more about what you're interested in (e.g., science, business, creative arts, hands-on work), I can give you a more personalized recommendation.
